

Valuable Tool

Use standard database tools
on LoggerNet data

Overview

LNDB is a application that enables you to easily move data from a LoggerNet data cache into a database such as Microsoft SQL Server or MySQL. Then you can use industry-standard software to access and

query your data for reports. LNDB also comes with QuickReports, an application that allows you to generate simple reports from an LNDB database with just a few mouse clicks.

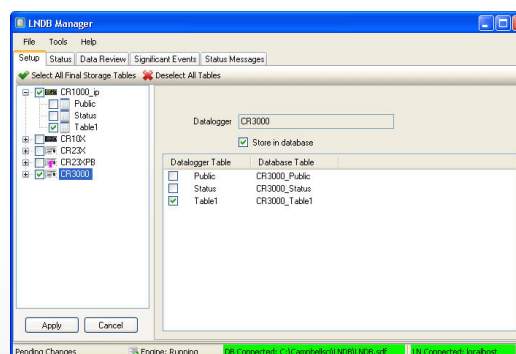

Benefits and Features

- › Moves data from selected LoggerNet tables into a database
- › Imports data from a data file into a database table
- › Exports data from a database table into a data file
- › Includes QuickReports application to design simple reports from an LNDB database
- › Allows you to review database data
- › Monitors the LNDB Engine

Technical Description

LNDB has two main components: LNDB Manager and LNDB Engine. LNDB Manager is used to set up a database and select the datalogger data tables that will be stored in the database. It also provides tools to monitor the LNDB Engine and to review the database data.

LNDB Engine runs as a service and sends the selected data from the LoggerNet data cache to the database. Additionally, LNDB includes utilities for importing and exporting data, and generating simple reports from your database data.

When a station is highlighted in the left tree, the station setup screen is shown. On the station setup screen, tables can be enabled/disabled for storage.

License for Use

LND B is protected by United States copyright law and international copyright treaty provisions. Installation of LND B constitutes an agreement to abide by the provisions of its licensing agreement. The agreement grants the user a non-exclusive license to use the software in accordance with the following:

- (1) The purchase of this software allows you to install and use a single instance of the software on one physical computer or one virtual machine only.
- (2) This software cannot be loaded on a network server for the purposes of distribution or for access to the software by multiple operators. If the software can be used from any computer other than the computer on which it is installed, you must license a copy of the software for each additional computer from which the software may be accessed.
- (3) If this copy of the software is an upgrade from a previous version, you must possess a valid license for the earlier version of software. You may continue to use the earlier copy of software only if the upgrade copy and earlier version are installed and used on the same computer. The earlier version of software may not be installed and used on a separate computer or transferred to another party.
- (4) This software package is licensed as a single product. Its component parts may not be separated for use on more than one computer.
- (5) You may make one (1) backup copy of this software onto media similar to the original distribution, to protect your investment in the software in case of damage or loss. This backup copy can be used only to replace an unusable copy of the original installation media.

LND B software may not be sold, included, or redistributed in any other software or altered in any way without prior written permission from Campbell Scientific.

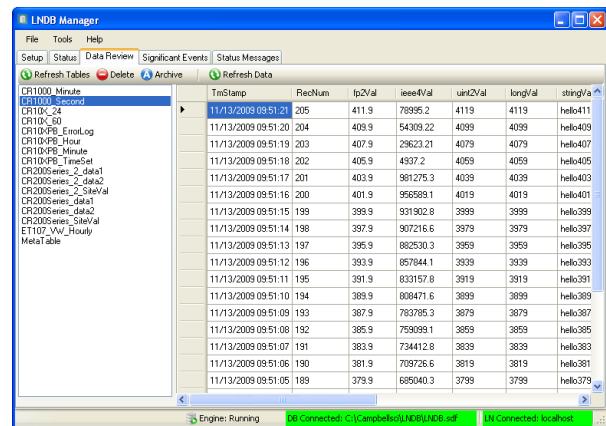

Specifications

- Computer Operating System: Windows® 7, 8, or 10; both 32 and 64 bit operating systems are supported

Supported Databases

- Microsoft® SQL Server® (Express, Standard, and Enterprise) 2005 – 2016
- Microsoft® SQL Server® Compact 3.5 SP2
- MySQL 5.0 – 5.7 (with an appropriate 32-bit Unicode ODBC database driver; for example, MySQL 5.0 or 5.1 with MySQL 3.51.27 or 5.1.6 ODBC database driver²; MySQL 5.6 with MySQL 5.3 ODBC database driver)
- May work with other versions of SQL Server Express, SQL Server Compact, or MySQL but they haven't been tested

²Earlier versions of 5.x ODBC database drivers have known issues.
