

Quality Counts

assuring the performance of new equipment

Optimised Performance

Assurance that new equipment is set to deliver maximum performance on your own line with your own products

Trained Operators

Ongoing maximum performance and plant efficiency ensured through the correct training and skill development of key line operators.

Assured Quality

Confidence that every pack is inspected to the highest standard possible to protect the welfare of your customers

IPac from Mettler-Toledo Safeline

At Mettler-Toledo we appreciate the importance of obtaining the optimum performance of new equipment from day one. Our comprehensive IPac qualification package ensures new machines are providing a return on your investment right from the start. Knowledgeable service professionals will confirm satisfactory installation of new metal detection systems and commission your equipment to achieve the highest level of performance. Getting the best from your metal detector, providing peace of mind for you and guaranteed product quality for your customers. Ongoing performance levels are assured through hands-on operator familiarisation training.

IPac Delivers

Optimised Performance

ISO standards state:

"Equipment shall be verified at specific intervals, or prior to use. The basis for verification shall be recorded. Records of the results of calibration and verification shall be maintained"

ISO22000 & ISO9001 Cl 7.6

The IPac qualification package supports your verification processes and includes:

- Confirmation of acceptable equipment installation standards
- Initial commissioning, set up and testing using your own products
- Generation of an initial performance verification certificate
- A proposal and schedule for a continuous performance verification programme

Trained Operators

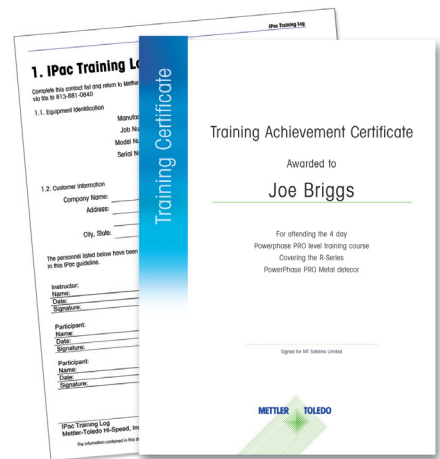

ISO standards state:

"Personnel carrying out activities having an impact on food safety/performing work affecting product quality shall be competent and shall have appropriate education, training, skills and experience."

ISO22000 & ISO9001 Cl 6.2

Well trained, competent operators ensure the ongoing performance of your system. IPac familiarisation training includes:

- Basic operation, functionality, user settings and optional features
- A fully documented log to verify operator training has been conducted
- Guidance for your staff on any routine maintenance procedures

Assured Quality

Regular testing of your metal detection equipment is an essential part of your quality system. Mettler-Toledo Safeline will provide:

- An initial system performance test using certified* test samples
- A standard operating procedure for effective equipment utilisation
- Guidance on the frequency of routine testing applicable to your manufacturing processes

*Note: Certified test samples are available and can be purchased at www.mt.com/pi
