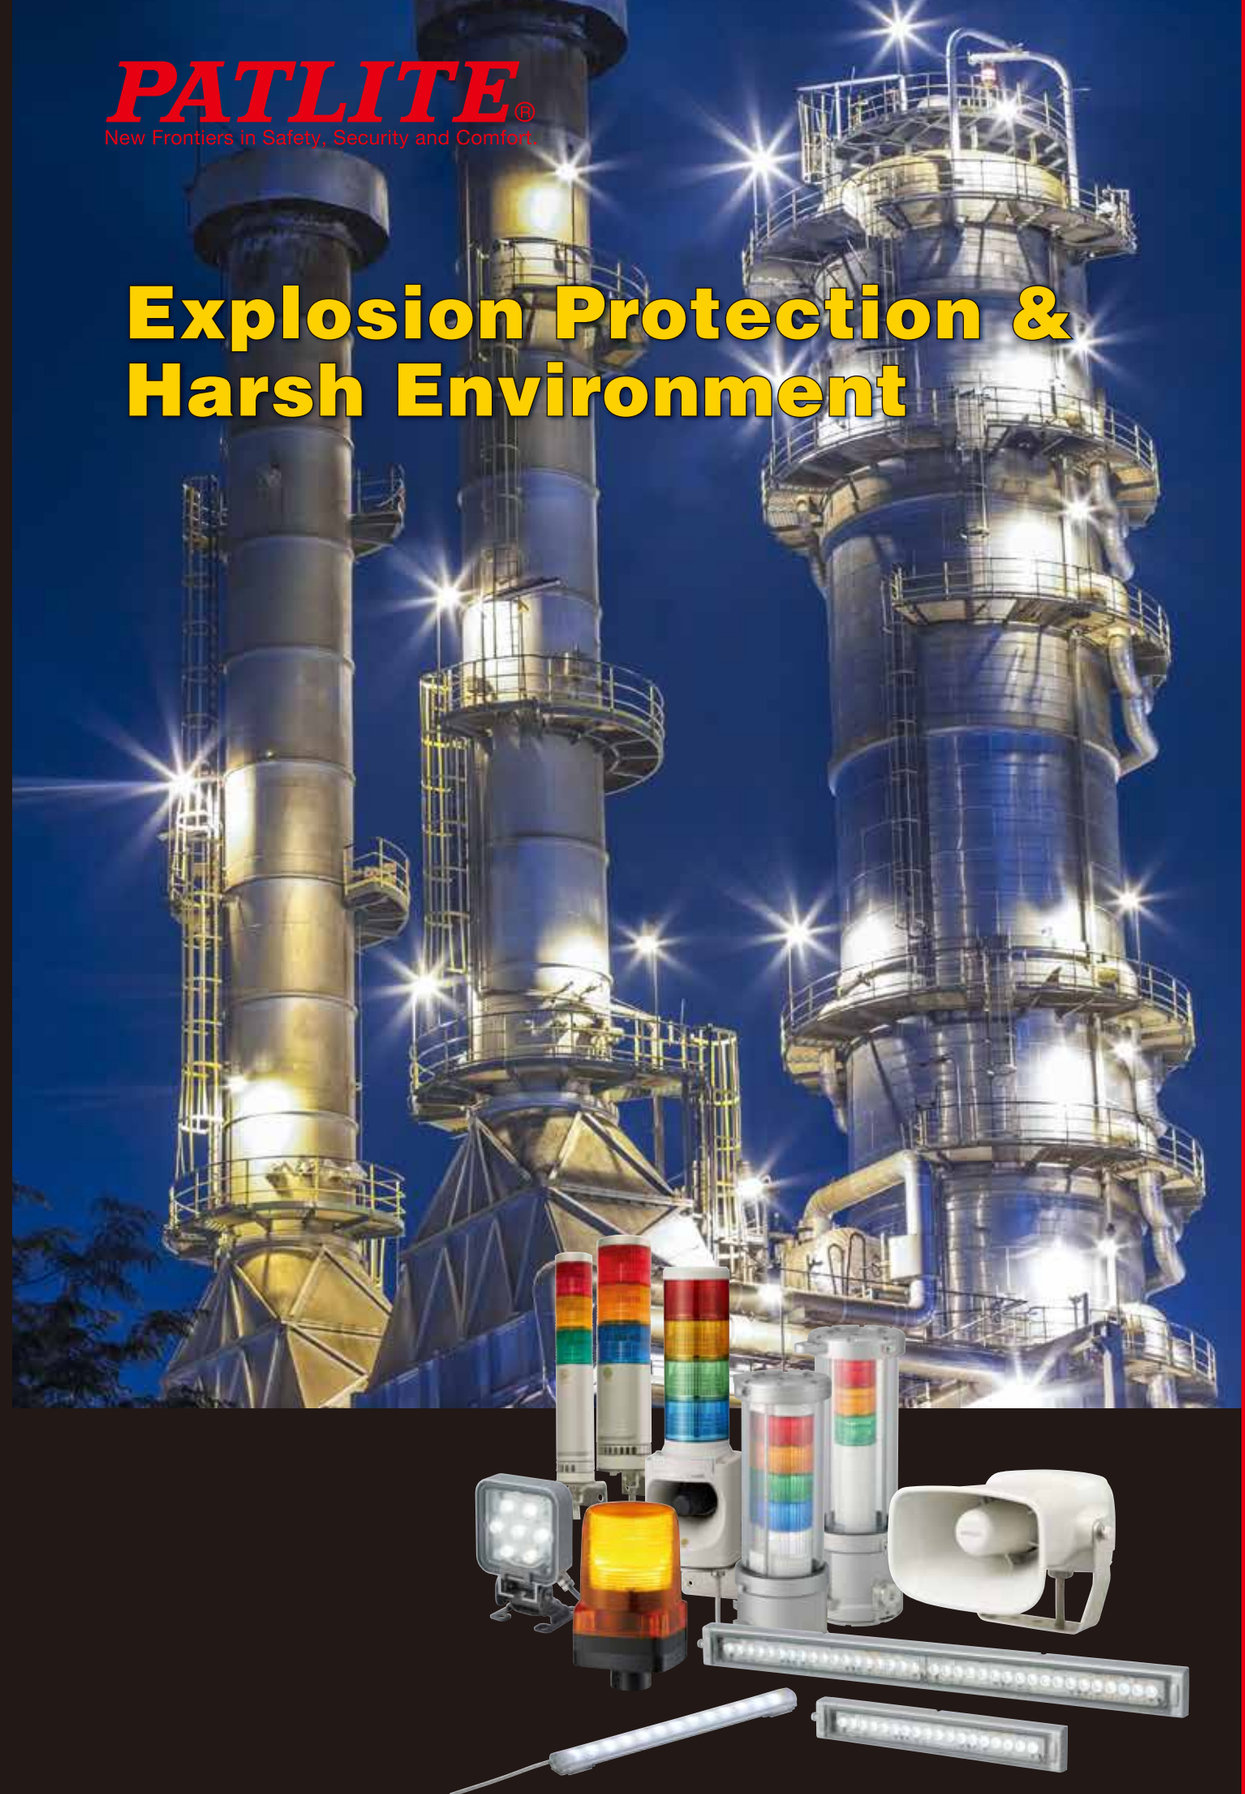
New Frontiers in Safety, Security and Comfort.

# Explosion Protection & Harsh Environment



www.patlite.com

# “New Frontiers in Safety, Security and Comfort” is PATLITE`s mission.

PATLITE offers state-of-the-art equipment for process and industrial automation for over 60 years. Our innovative and robust design, backed by a powerful commitment and years of knowledge, has made PATLITE the world’s best known manufacturer of the visual and audible signaling products.
We are also dedicated to the development of products that are safe in harsh and explosive environments to demonstrate our strong commitment to serving the industry with unique and innovative solutions.

In order to identify the diversified needs of our customers, and respond quickly and satisfactorily to those needs, we have implemented the POP (Point of Production) System together with a lean-manufacturing cell-based assembly system (combination, single, and flexible assembly).
These new systems allow us to handle any order rapidly from single items to customized item orders.

We’ve also reduced development time and production cost by having our own in-house machinery to design and manufacture metal moldings for making injection molded parts.

From designing to production, from raw material to the finished product, we also manage our quality control throughout the entire process. This is how we maintain our world class quality reputation for visual, audible signaling and networking information products.

## From designing to production, quality control is managed throughout the process

● Design with 3-D CAD

● Manufacturing of metal molding parts

● Electrical discharge machine

● Machining Center

● Injection molding machines

## Wide-range of Innovative and World-class Quality Products

## World-wide Sales, Marketing and After-sales Support Network

## How an Explosion Occurs

An explosion can only occur if there is a combination of the following three factors.

- Source of ignition
- Oxygen
- Combustible substances

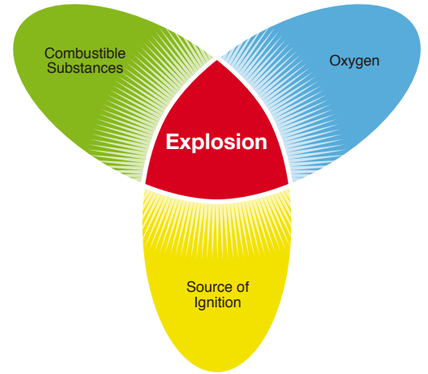
Combustible substances can exist in the form of gases, vapor, mist or dust. If one component is missing, no explosion will take place.

## How to minimize an explosion

The followings are protective measures to minimize the risk of an explosion.

- Limit concentration to a safe level
- Avoid combustible substances
- Increase ventilation
- Prevent the ignition
- Restrict explosive effects to a negligible level

**Prerequisites for an explosion**



## An explosive environment is categorized in three segments, Zone 0, Zone 1 and Zone 2, depending on the hazardous level of gases and vapors

**Zone 0**
An area where an explosive atmosphere consisting of a mixture of air containing flammable substances in the form of gas, liquid, or vapor continuously present or is frequently present for a longer period of time.

**Zone 1**
An area where an explosive atmosphere consisting of a mixture of air containing flammable substances in the form of gas, liquid, or vapor can occasionally occur during normal operating conditions.

**Zone 2**
An area where an explosive atmosphere consisting of a mixture of air containing flammable substances in the form of gas, liquid, or vapor is not likely to occur under normal conditions. However, if it occurs, it will only be for short period of time.

## ■ Various Applications for Explosion-Safe and Harsh Environments

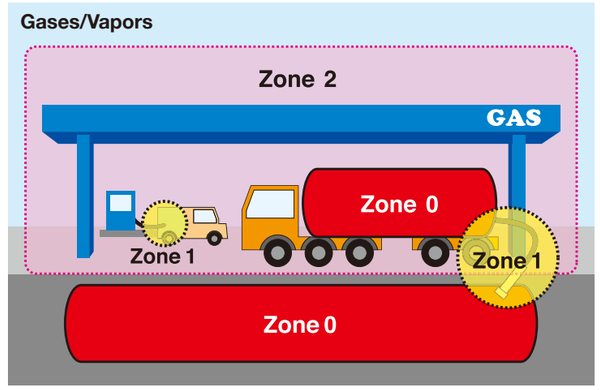
| | Branch | Explosion Hazard |
|---|---|---|
|  | Power Generation Companies | ● Lump Coal Dust |
|  | Woodworking Industry | ● Saw Dust<br>● Fine Wood Chips |
|  | Metal-work Operations | ● Explosive Metal Dust<br>● Spark-ignitable Metal Dust |
|  | Food/Beverage Industry | ● Ignitable Grain Dust<br>● Explosive Sugar Dust |
|  | Refinery Industry | ● Hydrocarbons close to their flash-points<br>● Oil Processing Plants |
|  | Waste Disposal Companies | ● Waste-water Treatment Gases |
|  | Landfills/Civil Engineering | ● Flammable Landfill Gases<br>● Uncontrolled Gas Emissions<br>● Flammable Gas from poor ventilation sources |
|  | Pharmaceutical Industry | ● Alcohol Solvents<br>● Materials explosive when mixed |
|  | Gas Suppliers | ● Natural Gas Leakage<br>● Natural Gas Emissions |
|  | Paint-spraying Operations | ● Overspray in Spray-paint Bays<br>● Solvent Vapor Emissions |
|  | Recycling Operations | ● Unemptied flammable gas/liquid containers<br>● Biodegradable Material Emitting Explosive Gases |
|  | Chemical Industry | ● Flammable Gases<br>● Flammable Liquids<br>● Flammable Solids |
|  | Agriculture | ● Bio-gas Production Plants<br>● Bio-gas Located on Farms |

# Classification of Hazardous Areas

## ■ Gases/Vapors

The tank is filled with flammable liquid. The inside of the tank is defined as zone 0, because the explosive gas/oxygen mixture is continuously present.
Vapor may escape on occasion through the vent on the top of the tank, therefore the area around the vent is categorized as Zone 1.

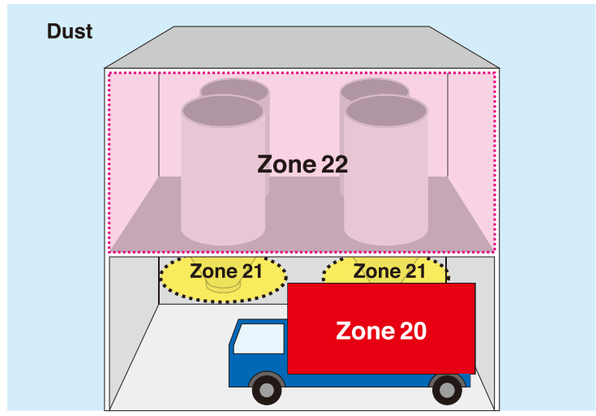
The vapor may also run down the outside of the tank, developing another explosive environment, so the area around the tank is categorized as Zone 2.



| | | Constant Exposure | Occasional Exposure | Rare and Temporary |
|---|---|---|---|---|
| ATEX | EN60079-10 | Zone 0 | Zone 1 | Zone 2 |
| IEC | IEC60079-10 | Zone 0 | Zone 1 | Zone 2 |
| US | NEC505 | Zone 0 (Class I ) | Zone 1 (Class I ) | Zone 2 (Class I ) |
| | NEC500 | Division 1 (Class I) | | Division 2 (Class I) |

## ■ Dust

At a mill with a feed hopper and filter:  A product, which causes dust particles mixed with air to cause a flammable mixture, is loaded into a hopper.
Inside the feed hopper and filter, it is categorized as Zone 20.
While the product is being loaded, the mixture of dust and air causes a potentially explosive compound in the area where the product is loaded into the hopper, so the area outside the hopper is categorized as Zone 21.
Around the hopper where a potential flammable atmosphere exists temporarily is categorized as Zone 22.



| | | Constant Exposure | Occasional Exposure | Rare and Temporary |
|---|---|---|---|---|
| ATEX | EN61241-10 | Zone 20 | Zone 21 | Zone 22 |
| IEC | IEC61241-10 | Zone 20 | Zone 21 | Zone 22 |
| US | NEC505 | Zone 20 (Class II) | Zone 21 (Class II) | Zone 22 (Class II) |
| | NEC500 | Division 1 (Class II) | | Division 2 (Class II) |

## ■ Relationship of IEC, CENELEC, NEC 505 and NEC 500

IEC: International Electrotechnical Commission
CENELEC: European Committee for Electrotechnical Standardization
NEC: National Electrical Code

| IEC/CENELEC | Zone 0 | | Zone 1 | | Zone 2 | |
|---|---|---|---|---|---|---|
| USA:NEC 505 | Zone 0 | | Zone 1 | | Zone 2 | |
| USA:NEC 500 | Division 1 | | | Division 2 | | |

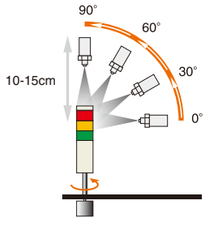
**IP □ □ IEC60529**

| | | | |
|---|---|---|---|
| 5 | The entrance of dust is not closed completely, but dust may not go into the device in such manner as to impair the optimal operation or safety of the device. | 5 | No detrimental effect occurs when a jet-stream is applied to the test sample from any direction. (TEST: 12.5 liter/min. of water is sprayed with a jet nozzle, having an internal diameter of 6.3mm, and a distance from the test sample of 2.5m - 3m away) |
| | | 6 | No detrimental effect occurs when water is sprayed onto the test sample by a jet-stream from any direction. (TEST: 100 liter/min. of water is sprayed with a jet nozzle, having an internal diameter of 12.5mm, with a distance of 2.5m - 4m away from the test sample) |
| | | 7 | Water must not enter into the device. No detrimental effect occurs when the device is submerged in a depth of 1 meter of water for 30 minutes. |
| 6 | No intrusion of dust into the device occurs. | 8 | Water must not enter into the device. No detrimental effect occurs when the device is continuously submerged. The test conditions are to be mutually agreed upon by the manufacturer and user. |

**IP69K** IP69K is the German DIN 40050 PART9 standard. It is defined as a protection regulation for high temperature and high-pressurized water. Water is heated up to 80 ˚C and sprayed at a water pressure in the range from 80 to 100 bars at 14 to 16 liters per minute at the test object. The test object is at a distance of 100 to150 mm from the nozzle and sprayed in all directions at 0, 30, 60, and 90 degrees, then sprayed at a horizontal angle while it is being rotated, all done for a period of 30 seconds without being affected by water penetration.



IP69K Test Procedure

# Types of Protection

According to EN Standard Series EN 60079, explosion protected electrical equipment can have various types of protection according to its construction. The table below for Gas and Dust shows an overview of the standardized protections and describes its basic principal, as well as its practical applications.

Select the suitable PATLITE explosion-safe and intrinsically-safe products according to the specific application and type of protection.

## Gas

| Type of Protection | Marking | Diagram | Definition | Applications | PATLITE Model |
|---|---|---|---|---|---|
| General requirements<br>EN 60079-0<br>IEC 60079-0 | | | | | |
| Flameproof Enclosure "d"<br>EN 60079-1<br>IEC 60079-1 | Ex d | | Parts which can cause ignition while in a potentially explosive environment are encased in an enclosure which can withstand the pressure to contain it when the explosive mixture ignites inside so it is not transmitted into the environment. | Switch Gear, Control Gear,<br>Display Units, Control Systems,<br>Motors, Transformers,<br>Heating Equipment, Light Fittings | EDLM Series<br>EDWM Series |
| Increased Safety "e"<br>EN 60079-7<br>IEC 60079-7 | Ex e | | Preventative safety precautions are applied to prevent the possibility of excessive temperatures, the occurance of sparks or electrical arcing within the equipment enclosure or on exposed parts of the equipment that would not be a hazard in conditions where ignition sources are not present. | Terminal Boxes, Connection Boxes,<br>Control Boxes (for installing Ex-components with different types of protection)<br>Squirrel-cage Motors, Light Fittings | |
| Intrinsic Safety "i□"<br>EN 60079-11<br>IEC 60079-11 | Ex ia<br>Ex ib<br>Ex ic | | Equipment used in a potentially explosive environment contains intrinsically safe electrical components only. The electric circuit is intrinsically safe when no sparks or internal heat produced under normal operating conditions and specific fault conditions is not capable of causing ignition in a given explosive atmosphere. | Measurement and Control Technology,<br>Communication Technology, Sensors,<br>Actuators.<br>ia = use in Zone 0, 1, 2<br>ib = use in Zone 1, 2<br>[Ex ib] = associated equipment - installation in safe areas | |
| Oil Immersion "o"<br>EN 60079-6<br>IEC 60079-6 | Ex o | | Electrical equipment or parts are immersed in a protective fluid (such as oil), to prevent the ignition of a potentially explosive atmosphere which may be located over or outside the equipment. | Transformers,<br>Starting Resistors | |
| Pressurized Enclosure "p□"<br>EN 60079-2<br>IEC 60079-2 | Ex p | | Inside the enclosure, a positive internal pressure in relation to the surrounding atmosphere is maintained with the supply of a constant flow of protective gas (when necessary) to dilute any combustible mixtures. | Switch Gear, Control Cabinets, Analyzers,<br>Large Motors.<br>px = use in Zone 1, 2<br>py = use in Zone 1, 2<br>pz = use in Zone 2 | |
| Powder Filling "q"<br>EN 60079-5<br>IEC 60079-5 | Ex q | | The casing of the electrical equipment is packed with fine granular material to make it impossible for any electric arc created inside the casing under certain operating conditions to ignite the potentially explosive environment outside the casing. Ignition cannot be the result from flames or the raised temperature on the surface of the casing. | Sensors,<br>Display Units,<br>Electronic Ballasts,<br>Transmitters | |
| Encapsulation "m□"<br>EN 60079-18<br>IEC 60079-18 | Ex m | | Parts which can cause ignition in a potentially explosive environment by sparking or heating are enclosed in a compound to contain and isolate it from the ignition of an explosive environment. | Switch Gear with small breaking capacities,<br>Control and Signalling Units,<br>Display Units,<br>Sensors.<br>ma = use in Zone 0, 1, 2<br>mb = use in Zone 1, 2 | |

# Maintenance Free LED Signal Lights

The EDLM and EDWM series LED signal lights are visual warning and status indicating lights for use in hazardous locations that require compliance with the ATEX Directive 94/9/EC (CENELEC standard) or NEC Article 505 certification.

The EDLM and EDWM series offer wide range of voltages and versatile mounting options to meet various applications. The following chart explains the comparison between the ATEX Directive 94/9/EC (CENELEC standard) and NEC Article 505 certification. To find the most suitable models, refer to page 9 and 10.

EDLM EDWM

## ■ Protection Method (ATEX/IEC)

**Flame-proof Enclosure Type "d"**
In flame-proof enclosures, an explosion is contained.

**Protection Type "t"**
Dust-protected and flame-proof enclosure.

# Visual/Audible Signaling Products & LED Work Lights

A wide range of visual and audible signaling products, as well as super bright LED light bars, designed for use in hazardous locations that require the ATEX Directive 94/9/EC (CENELEC Standard). These unique and innovative models meet the criteria for Zone 2 (gas) and Zone 22 (dust) atmospheres.

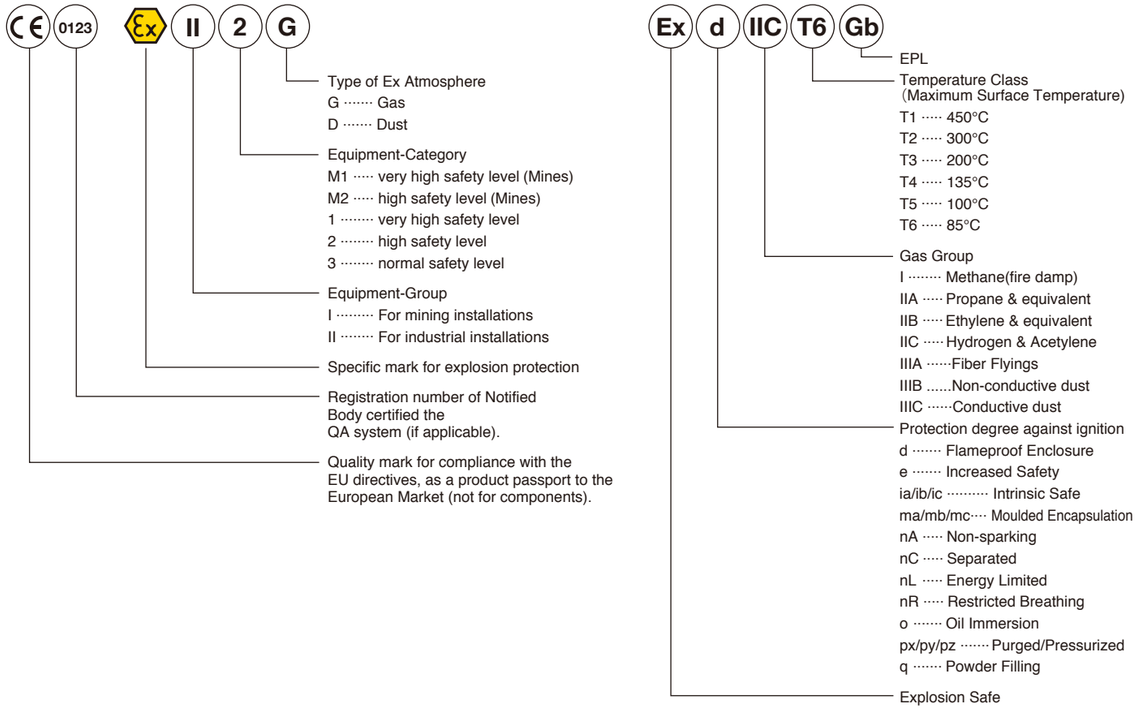
## ■ Markings

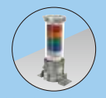


# EDLM SERIES & EDWM SERIES EXPLOSION-SAFE

FM APPROVED

Wall Mount

Horizontal Mount



Vertical Mount

## ■ Descriptions

The EDLM (3 tiered LED) and EDWM (5 tiered LED) models are innovative LED maintenance-free Explosion-safe Signal Towers. Their robust design, along with pressure and flame-proof housing is ideal for use in potentially flammable and hazardous explosive environments, such as chemical, petrochemical, combustible dust, mineral/natural gas production; as well as for the food and beverage industries.

## ■ Features

- Housing: Aluminum alloy
- Glass: Borosilicate glass
- Terminals: Easy wire connection to the Signal Tower by opening the bottom
- Mounting: Upright, Wall Mount, Vertical-mount, and Horizontal Mount
- LED color: Different color configurations are possible to custom-design
- Voltage: AC/DC24V, AC120V, AC230V, AC90-250V are available.
- Wire core size: 0.5mm²~0.8mm², AWG20~AWG18

## Explosion-safe Signal Light Ø40mm

RoHS CE

### ■ Description

Explosion-safe Signal Light featuring an LED light that is versatile and energy-efficient. The vertical and horizontal cut lenses in combination with a double-reflection system enhances the LED light diffusion to create a unique, full and brilliant light. The lenses and main body are made of strong synthetic materials with characteristics to withstand harsh environments. The Signal Light can be ordered in any combination from 1 to 5 LED units with any color combination. In addition to its “continuous lighting” condition, the Signal Light can also be ordered with flashing / non-flashing functions, as well as with two super-loud alarm sounds with an 85dB (at 1m) output.

### ■ Features

- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE compliance in accordance to ATEX
- Full and brilliant lumination
- LED double reflection lighting system
- Different lens colors available
- 1 to 5 stack are available
- 1/2” NPT adapter for pole mount is available as an option
- Available with “flashing/non flashing” and two audible buzzer alarm sounds
- Ingress protection of IP65
- Wall-mount or 1/2" NPT mount

Side mount bracket 1/2 inch NPT

Two types of mounting available

## 105dB(A)
## MP3 Field Programmable Annunciator, Melody Horn

- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE compliance in accordance to ATEX
- Super bright LED colors correspond to different voice, sounds, chimes and melodies.
- Voice alert messages of up to 63 seconds (64kbit/s) with 5 channels can be played back.
- 32 combinations of sounds, chimes and melodies are pre-recorded.
- 8 sounds can be played back by a bit input, and 32 sounds by binary input.
- Volume is adjustable from 0 to 105dB at 1 meter.
- Field programmable with MP3 by SD card for the model LKEH-FV-EX.
- Well visible with the super bright 100mm diameter LED from far distance.
- Robust design to withstand against 2G vibration.
- The body is made of Acrylonitrite-Ethylene-Styrene for weather resistance.
- Easy to control by only one common wire for both LED units and audible signals.
- NPN is standard. PNP open collector type is also available on order.

## 105dB (at 1m) Melodies & Chimes Horn

- Protection Rating of IP65.
- Explosion-Safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE Compliance in accordance to ATEX
- EHS-EX comes with 32 preloaded melody and alarm sounds with adjustable volume up to 110dB (@ 1m).
- Robust, indoor and outdoor use with vibration resistance up to 4.5G.
- EHV-EX comes with 63 preloaded crisp and clear melody and alarm sounds with adjustable volume up to 110dB (@ 1m).
- EHV-EX offers a field-programmable MP3 function with a maximum of 220 sec. of recording time (@ 64kbps) and an adjustable volume up to 105dB (@ 1m).
- Ideal for plant-wide notification, public address and process control.
- UL464, CSA-C22.2 NO.205-M1983, FCC Part 15 Subpart B Class 4.
- CE, RoHS Compliant (EHS-M1 and EHV-M1 Only).

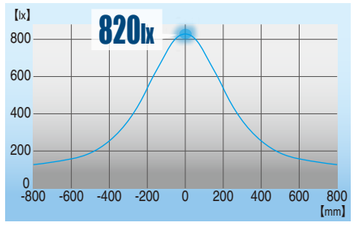
## Water/Oil Resistant LED Work Light

RoHS CE

- 820 lx brightness, equivalent to a 40 watt incandescent bulb
- 60,000 hrs., or about 7 years of long service life (*1)
- IP66G, IP67G, IP69K protection (*2)
- DC24V (Polarized)
- IEC62471 Compliance (Photobiological Safety Standard)
- Daylight Color Temperature (6,500K) suitable for very detailed work
- Comes with a flexible stainless-steel angle bracket for versatile installation (*3)
- Wide operating ambient temperature range (-40°C to +60°C)
- Low current draw of 174mA
- Very compact, light-weight and durable design
- (Thickness) 22.2mm X (Width) 85mm X (Height) 128mm

CLN-24-CD-PT-EX

## Light Distribution Characteristics



High power LED with 820 lx provides sufficient illumination with only a 174mA current draw.

Stainless steel flexible angle bracket allows a versatile installation, instantly enabling direct illumination to the work area.

### Floor Mount

### Wall Mount

### Ceiling Mount

※ The pan/tilt brackets can also be removed for Rear Attachment applications.

Color temperature of 6,500K is suitable for detailed and fine work, while providing photobiological safety.

Natural light distribution when illuminating a wider work area with an equivalent to a 40W incandescent bulb with 550 lumens.

## Specifications

| Model | CLN-24-CD-PT-EX |
|---|---|
| Color Code (Color) | CD (Daylight) |
| Color Temperature (typ.) | 6500K |

# LFH-EX EXPLOSION-SAFE

CE Ex II 3GD Ex nA IIC T4 Gc, Ex tc IIC T85°C Dc IP66 94/9/EC(ATEX)CENELEC:EN 60079-0, EN 60079-15, EN 60079-31

## Indoor/Outdoor LED Warning Light

NEW

RoHS CE

- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- Dome colors: Red, Yellow, Blue
- Triple flash, 110 +/-10 flash/minute
- Indoor/Outdoor use allows for the unit to be used in various environments such as factories, utilities, food and beverage, pharmaceutical, parking lots, and others.
- Vibration resistance of 90m/s² (9G)* can withstand the mounting on to forklifts, construction, maintenance, and other industrial vehicles.
- ½" NPT adaptor
- IP66 (IEC60529)
- NEMA Type 4, 4X, 13
- RoHS Directive (EN50581)
- CE
- FCC Part 15 Subpart B Class A

Model

Rated Voltage
24: DC24V
M2: AC100-240V

Color
R: Red
Y: Yellow
B: Blue

## ■ Specifications

| Model | LFH-24 | LFH-M2 |
|---|---|---|
| Rated Voltage | DC 24V | AC 100V/120V/200V/230V |
| Operating Voltage Range | DC 20V~30V | AC 100V~240V |
| Operating Ambient Temperature | -22°F ~ +158°F (-30°C ~ +70°C) | -4°F ~ +140°F (-20°C ~ +60°C) |
| Operating Ambient Humidity | Less than 90% (No condensation) | |
| Mounting Location | Indoors and Outdoors | |
| Mounting Direction | Upright, Inverted, and Sideways (In a wet environment) | |
| Vibration Resistance | 90 m/s 2 | 20 m/s 2 |
| Protection Rating | IP66 (IEC 606529) | |
| Luminous Intensity | Red: more than 112cd Yellow: more than 177cd Blue: more than 52cd | |
| Weight (+/- 10%) | 20.1oz (570g) | 21.5oz (610g) |

*Vibration resistance 20m/s² for the LFH-M2

# RES-A Heavy Duty Revolving Warning Light for Harsh Environment

## Robust Heavy Duty Revolving Warning Light

- φ224mm diameter.
- Integral Rotating Parabolic Reflector: For enhanced visibility from a distance.
- Installation: Indoors—upright, inverted, sideways; Outdoors—upright only.
- Main Body: Aluminum alloy die-cast with silver color baked finish.
- Dome: Acrylic resin covered with clear hard-glass, and metal guard.
- Available Colors: Red, Amber, Green and Blue.
- IP66
- The metal cable gland is an optional part. Needs special order.

The metal cable gland is only available as an option. Please order it separately.
