

BROKEN TOOL DETECTOR TYPE 101

APPLICATIONS

The broken tool detectors type 101 are used to detect a break of tool or a parts presence or absence.

Each cycle, the detector needle contacts the tool to sense its presence.

TECHNICAL CHARACTERISTICS

-Technology	Pneumatic - rotating
-Stroke	126°
-Min.diameter tool	1,5 mm
-Max. distance / tool axis	200 mm
-Response time	50 ms
-Pressure required	5 bars minimum
-Operating temperature	+10°C - +60°C

ACCESSORIES

- Short fixing screw..... >REF : **0102VFTCX1**
- Long fixing screw..... >REF : **0102VFTLX1**
- Hard chromium plated needles..... >REF : **101TPGCHD**
