

Technical Specification Sheet

Sack & Stair Trolley

The Sack & Stair Trolley helps to reduce the need for strenuous manual handling and is a practical aid for moving heavy loads over large distances or up and down stairs.

The multi-functional trolley offers easy and fast transportation in tight space conditions and can be quickly converted from a standard flat bed trolley into a sack truck and stair-climbing aid.

Ideal for construction sites, warehouses, workshops and more, the Sack & Stair Trolley is available with either a 350kg or 500kg payload.

Features

- Payload: 350kg (3 wheel model) or 500kg (4 wheel model)
- 3 wheel model has a 150kg capacity as a stair climbing aid
- Length to handle: 1050mm
- Total length 1210mm
- External wheel width: 500mm
- Dimensions of load bed 985 x 320mm
- External dimension with open side brace 860mm
- Shovel length 210mm
- Weight of trolley 25kg (3 wheel), 30kg (4 wheel)
- Ref: AGT110 (3 wheel) AGT111 (4 wheel)
