Compact SIMS

A design breakthrough for surface analysis

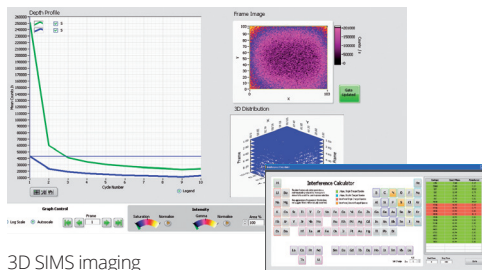

For analysis on the nanometre scale for depth profiling and surface imaging for research, production monitoring and qualification.

Applications:

- ▶ Solar cells
- ▶ Glass coatings
- ▶ Metallic thin films

Features:

- ▶ Small footprint
- ▶ Easy user friendly layout
- ▶ Positive SIMS and SNMS
- ▶ Depth Profiling
- ▶ 3D characterisation and imaging
- ▶ Mass spectra
- ▶ Isotopic analysis
- ▶ Analysis on the nanometre scale

3D SIMS imaging
