

SNAP VALVE

Gas Valve

One Touch On/Off Gas Valve

The Snap Valve Set is highly recommended by current Koike portable customers. The Snap Valve saves time and gas waste by allowing the operator to set the preheating flame just once. Lighting the torch and gas shutoff are just a snap of the valves, up for gases on and down for gases off. Three hose input torches such as the IK-12 MAX3 sets have the option of using the Snap Valve to control the cutting oxygen. The Snap Valve even allows less experienced cutting operators to perform high quality cuts every time, once the preheat flames are set the first time.

Features & Benefits

- **Three Sets Available**
Designed for use with many Koike portable cutting machines.
- **Set Preheating Flame**
Allows the operator to set preheating flame just once; gases can then be turned on and off with just the snap of the valves; allows less experienced operators to make quality cuts.
- **Quickly Turns Gases On and Off**
Saves gases and time by not requiring the torch valves to be adjusted each time before and after a cut.
- **Chrome Plated**
Provides corrosion resistance and increased durability.
- **Easy Grip Valves**
Allows gloved hands to quickly turn gases on and off.
- **The Choice of Professionals**
Used by professionals to reduce cutting time and gas costs in metal fabrication, shipyards, tank building, steel service centers and other related industries.
