## Company Profile

**Korenix Technology**, a Beijer group company within the industrial communication business area, is a global leading manufacturer since 2004. We provides innovative, market-oriented, value-focused industrial wired and wireless networking solutions including various product lines:

- Industrial Ethernet Switch
- Industrial Power-over-Ethernet Switch
- Industrial Wi-Fi/Cellular Solution
- Industrial Media Converter
- Industrial Connectivity
- Network Management Software

# Key Features – Cyber Security

The trends of Internet of things (IoT) and Industrial 4.0 brings more devices to be connected to networks. Security issues and hack attacks become even more critical nowadays. Korenix developed "Cyber Security" features that meet IEC-62443-4-2 which provide more safety and reliable network infrastructure.

## Network Level Defense

- DHCP Snooping
- Dynamic ARP Inspection
- IP Source Guard

## Traffic Level Defense

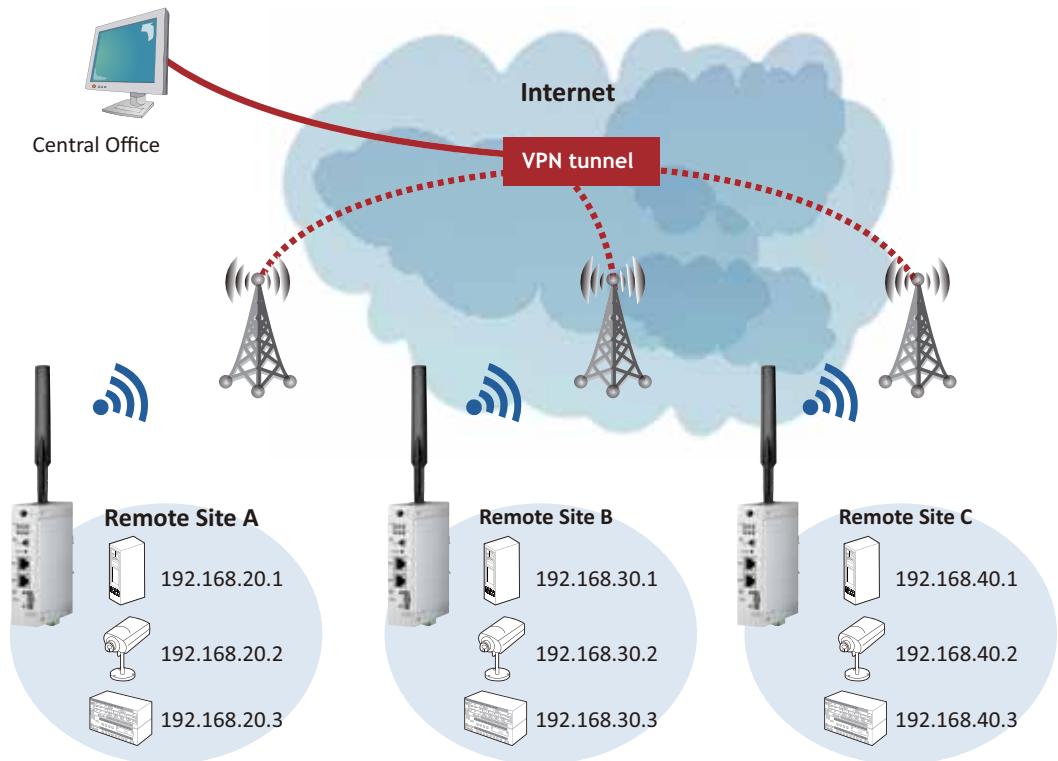

- L3/L4 ACL block untrusted traffic from a trusted device
- Precise video stream isolation

## Device Level Defense

- L2 ACL identifies and authorizes a device
- Only trusted devices can access the network

Function	Application	Benefits
DHCP Snooping	Ensure clients obtain IP from authorized server	Preventing unauthorized DHCP attack
Dynamic ARP Inspection(DAI)	Binding IP + MAC on devices	Only authorized devices can access into the network
IP Source Guard(IPSG)	Validates incoming packets	Prevents IP address spoofing
Multi-Level Authentication	Different levels users' authentication	Different privileges according to different levels
TACACS+	Remote authentication for network access control	One-time authentication on devices, higher security

**VPN (Virtual Private Network)** extends a private network across a public network as if it were directly connected to the private network. It provides security by the use of tunneling protocol and often through procedures such as encryption.

# Key Features – Redundancy

# Multiple Super Ring

# Beyond Fast Recovery

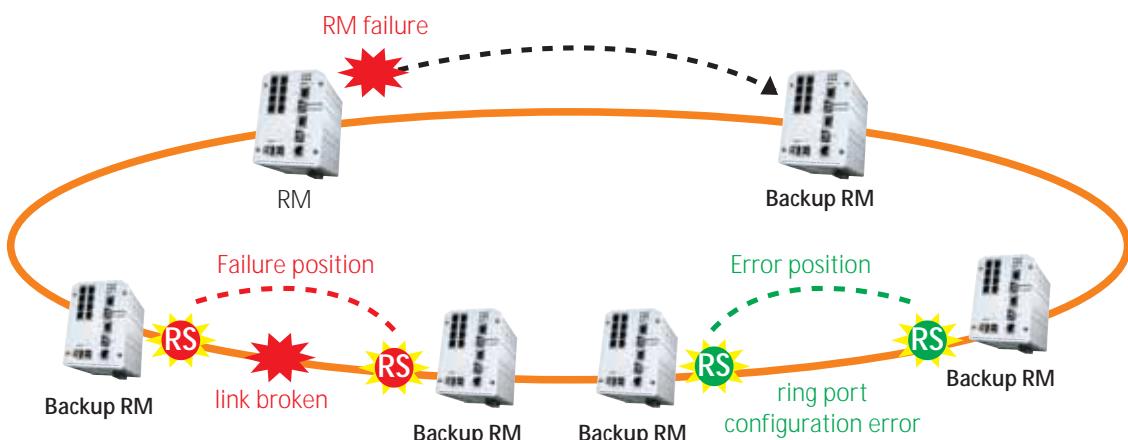

It's reliable, stable, quality and broadcast-storm-free.

## RM Redundancy

While RM is the only manager in the ring, Korenix-patented **RM Redundancy** solves the critical point problem and guarantees the ring is always well-controlled.

# Backup RMs All Standby

Every switch other than the RM is **Backup RM**. One of the backup RM will immediately take over the role if the RM happens to fail. No manual configuration is required.

**5 ms\* Failure Recovery  
0 ms Link Restoration**

Korenix-patented **Seamless Restoration** introduces the most stable restoration process to the world:

- No packet loss
  - No broadcast storm
  - No influence to the network

## Seamless Restoration

## Packet loss

## Broadcast storm

# Failure Positioning Failure Identification

Korenix NMS and the RS LED (Ring Status) help administrators and field engineers to identify the type and location of a failure, which quickens troubleshooting.

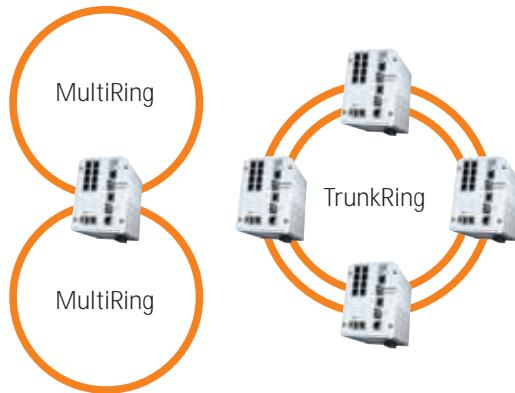

**Korenix NMS** points out the failure position

\*Note: support on target models

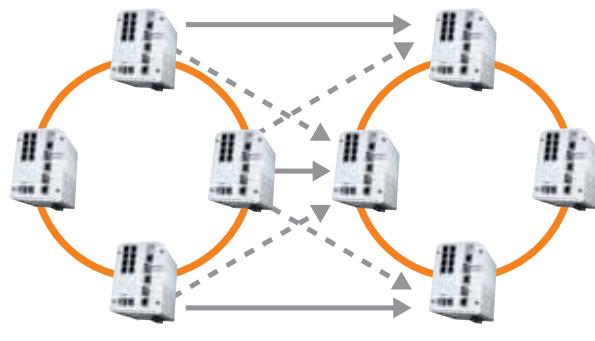

## MultiRing, TrunkRing Flexible Ring Deployment

MultiRing provides the simplest way to connect multiple rings together. TrunkRing combines port trunk and MSR technologies, which doubles the network bandwidth and the link redundancy.

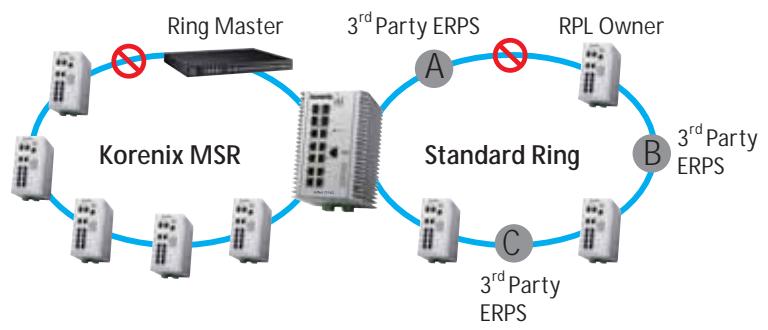

## Rapid Dual Homing Double, Triple... Redundancy

Simply enable the function and connect two rings through multiple links in free style without complex configurations such as master, slave, coupler port and so on. The failover time is less than 50ms and restoration time is 0.

**Korenix offers both proprietary and open technologies to meet various requirements.**

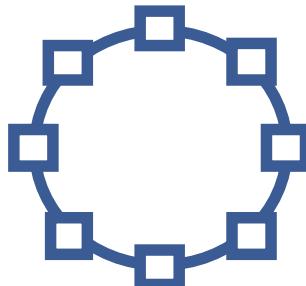

- Korenix Proprietary: MSR (Multiple Super Ring)
- Standard Network Redundancy
  - IEEE 802.1d Rapid Spanning Tree (RSTP)
  - IEEE 802.1s Multiple Spanning Tree (MSTP)
  - ITU-T G.8032 ERPS

## Korenix MSR

### Ultra Fast Recovery Without Single Point Of Failure

One of the best redundant technology, 5ms\* fast recovery, 0ms seamless restoration, without risk of the single point of failure on RM.

\*Note: support on target models

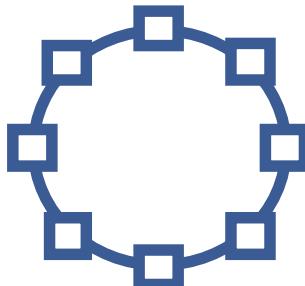

## ERPS V1

### Single Ring With Multiple Vendors Mixed

## ERPS V1

### Single Ring With Multiple Vendors Mixed

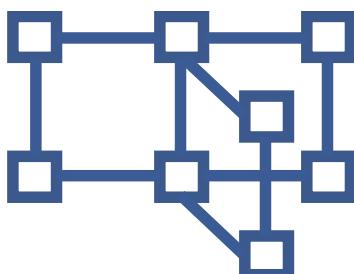

Takes the advantage of the openness, the switches in a ring will not be tied to specific supplier any more. Moderate failover time, 50ms recovery, 50ms restoration.

## ERPS V2

### Flexible In Topology Without Compromise On Recovery Time

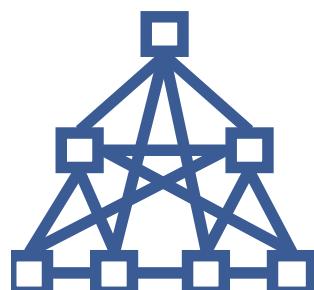

Future proof, easy expansion by adding unlimited levels of rings. Each ring operates independently, and the recovery time in all rings are deterministic, 50ms recovery, 50ms restoration.

## RSTP

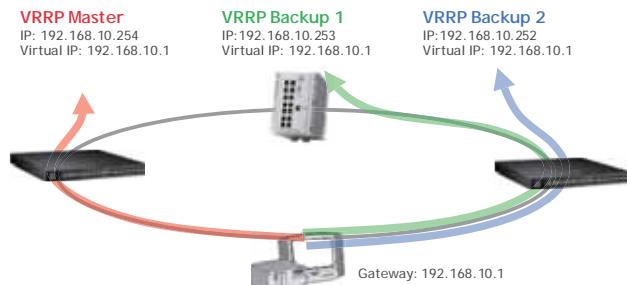

### Any Topology, Multi- Vendors, Recovery Time Is Not Critical

The main purpose of RSTP is for connecting switches from different vendors into any kind of topology. It's flexible and safe, however, the recovery time is not deterministic, depends on the size and topology.

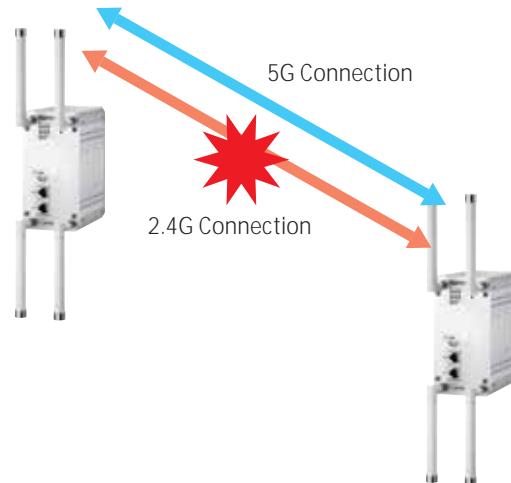

# VRRP (Virtual Router Redundancy Protocol)

VRRP increases the availability and reliability of routing paths via automatic default gateway selections on an IP subnetwork group. If one router goes down, one of the other group members can take place for the responsibilities for forwarding the traffic.

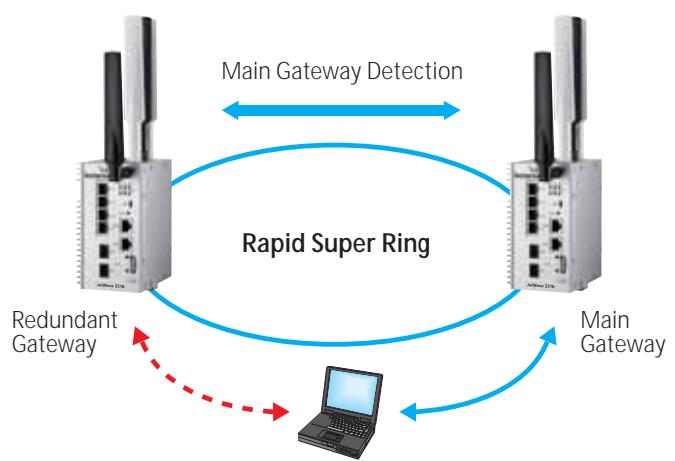

# Dual Radios for wireless Redundancy

JetWave 3220 supports two Wifi interfaces that can be configured as 802.11a/b/g/n/ac and 2.4G/5G band. By connecting the two Wifi interfaces to the same peer, the two links backup with each other. Users can assign primary link on one interface and backup link on the other.

# RSR Redundant Gateway

JetWave products support RSR Redundant Gateway design: the main and redundant gateway exchanges the same gateway settings with each other while the RSR ring is normal. Once the main gateway is shutdown or the RSR ring abnormal, the backup gateway is activated to ensure the edge client devices still can access the internet through backup gateway.

# Key Features – Power over Ethernet

## Per Port Power Budget

Defines an upper bound of the PoE output of each port to prevent over consumption from a malicious or malfunctioning PD.

Port Configuration

Port	PoE Mode	Powering Mode	Power Budget(W)	Power Priority
1	Disable	802.3af	32.0	Critical
2	Enable	802.3af	15.4	Critical
3	Enable	802.3at(2-Event)	32.0	Critical
4	Enable	802.3at(LLDP)	32.0	Critical
5	Enable	Force	32.0	Critical

## PoE On Demand

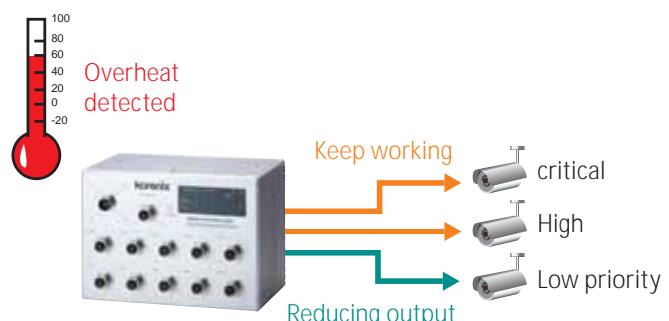

**PoE scheduling** turns on/off a PD according to the user defined schedule, **802.1AB LLDP** PoE negotiates with PD to give power on demand. It's simply green and efficient.

Power over Ethernet Schedule

Time	Sunday	Monday	Tuesday	Wednesday
09:00				
01:00				
02:00				
03:00				
04:00				
05:00				
06:00				
07:00				
08:00				

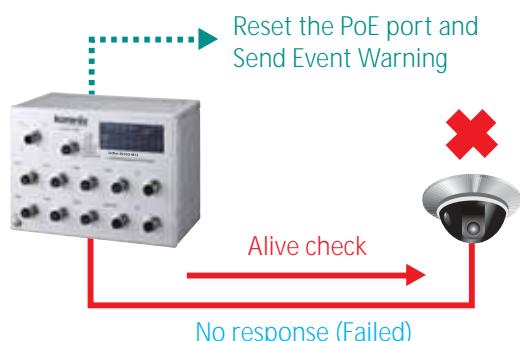

## Overheat Protection

An embedded thermal sensor warns of overheating. The PoE output of less important ports will be reduced to ensure critical PD functioning in abnormal conditions.

## PD Keep-Alive Check

LPLD does a keep-alive check on PD periodically and resets the PoE port to bring the PD back to life if a PD failure is detected.

# Key Features – Full Network Management

## Full Network Management Features with Lite Managing Interface

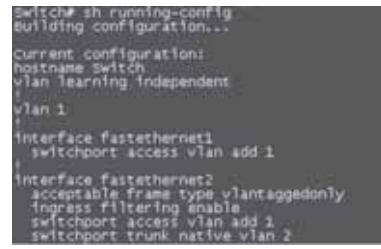

Korenix managed switches support the most commonly used network management features such as MSR, RSTP, VLAN, QoS, IGMP snooping and so on. Users who do not need advanced group management features or SNMP can benefit from this cost effective solution in their projects.

User-friendly web interface

utility

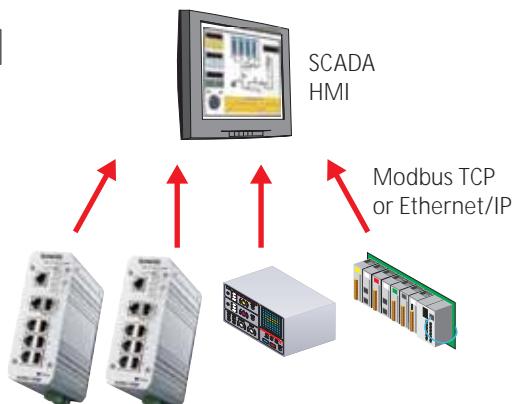

```
switch# sh running-config
building configuration...
Current configuration:
hostname switch
vlan learning independent
vlan 1
interface fastethernet1
switchport access vlan add 1
interface fastethernet2
acceptable frame type vlan taggedonly
 ingress filtering enable
switchport access vlan add 1
switchport trunk native vlan 2
```

Cisco-like CLI

## Modbus TCP, Ethernet/IP Managed for Industrial Integration

Industrial engineers are able to include JetNet switches and monitor the network status on their SCADA or HMI systems through Modbus TCP or Ethernet/IP without the need of IT knowledge or an additional network management system.

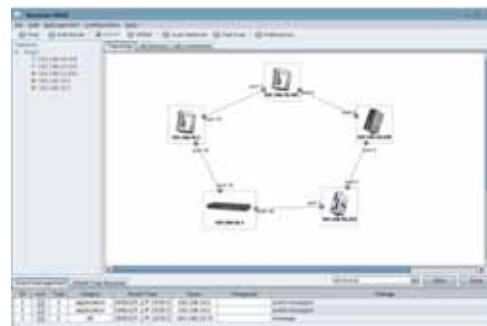

Monitor and control the network and the industrial devices through one single management interface

# Key Features – Software Tool

## Korenix NMS

Korenix NMS (Industrial Intelligent Network Management System) provides a comprehensive platform for monitoring, configuring, and maintaining mission-critical IP-based communication networks.

## Korenix View

Korenix View is a client/server architecture based management tool that will discover Korenix devices on all network interfaces or the specific one. Group management is supported. With group assign IP address, firmware upgrade..., it can help to achieve an efficient management.

ID	Device Name	IP Address	Network	Status	Date

# Industrial Certificates

# Application – Smart City

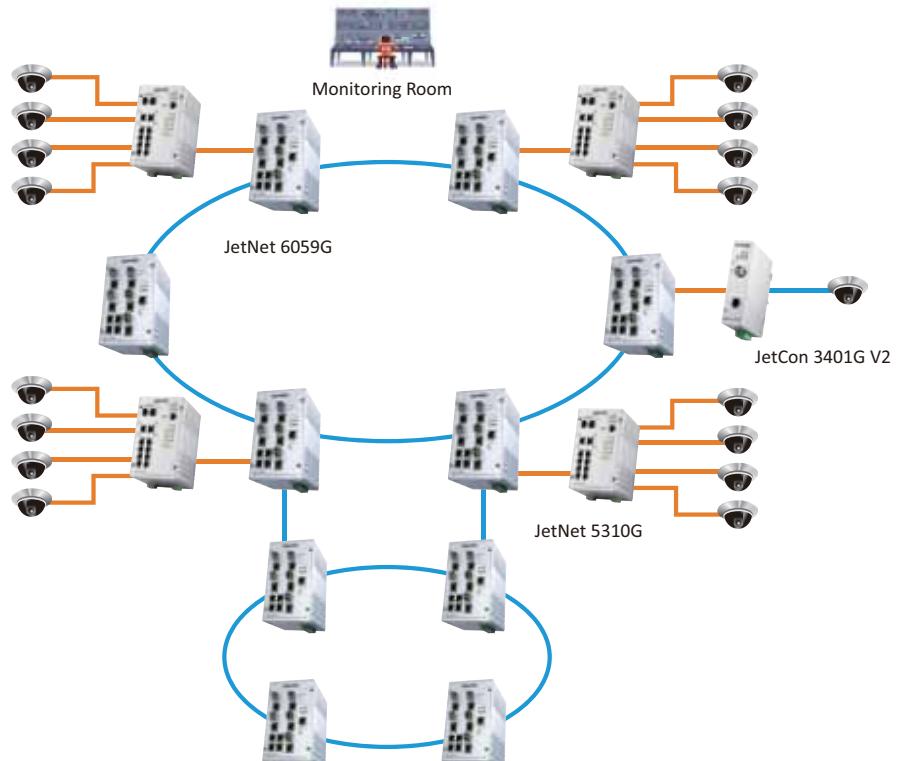

## Sports Complex Surveillance

This sports complex in Middle East occupies more than 800,000 sqm, and contains two football stadiums, training fields, hotels, and apartments which make this location absolutely critical in terms of security. High quality and live video with no time delay is the main objective of video surveillance projects.

## Korenix Solution

High definition IP cameras have been installed in most of locations in the sport complex - main gates, entrances, parking zones, auditoriums, corridors and storage areas. A reliable network infrastructure with minimum possibility down time, fast recovery from disasters and centralizing management system was a big challenge for project managers. Korenix Ring and PoE switches provided reliable network solution connecting long distance between buildings and central monitor room, solved the power supply problem to the cameras. It works reliably even the temperature in summer is higher than 60°C.

## Applied Models

PoE Switch

# Application – Surveillance

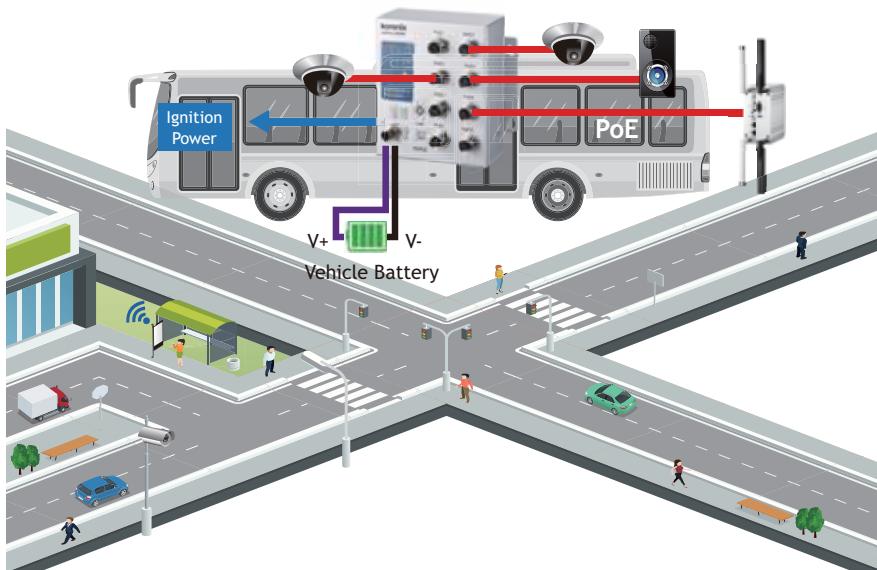

## Bus Surveillance

Surveillance in public transportation ensures the safety of passengers and driver, and plays an important role in criminal investigation. PoE camera is commonly used on bus since it can be powered by PoE switch through the Ethernet cable and achieve data transmission. A bus company chose Korenix's E-Mark compliant PoE switch for their project. It is rugged, plug-and-play unmanaged switch equipped with robust M12 connector design in order to be used well in the vibrating environment.

## Korenix Solution

JetNet 3808G-M12 was implemented DC-to-DC power booster technology. It can take power input range from 9 to 36V and boost to 54V to provide stable power feeding for the powered devices. Another special power design for bus application is "power ignition." In a case that only engine is turned off but the entire vehicle system is on, the feature will set the switch automatically power off after a certain time to prevent the battery from running out.

Certifications includes EN50155, E-Mark and EN50121-4 to ensure high availability and wide usage particularly for bus, train and track side application.

## Applied Models

# Application – Transportation

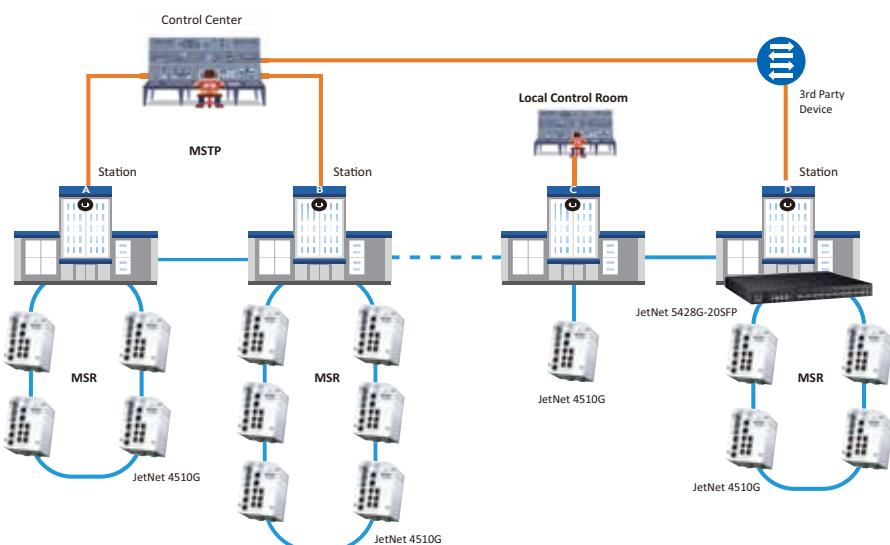

## Qinghai - Tibet Railway

The Qinghai-Tibet railway is the highest plateau railway in the world. To ensure a reliable operation in the extreme environment, the authority built a monitoring and control system on its power SCADA system along all the track line.

## Korenix Solution

Korenix was chosen as its main network system for the ability to work stably in extreme conditions - strong winds, heavy sandstorms and more than a 30°C temperature variation during one day. The IP31 aluminum housing offers great cooling effect, and protects the device from heavy sandstorms. EN50121-4 EMC level compliance ensures to protect the switches from the frequent thunderstorms.

114 pieces of JetNet 5428G and 96 pieces of JetNet 4510 were installed in 22 railway stations and the 96 field sites. Two levels of rings are designed for better scalability. Each field-level ring consists of several JetNet 4510 that run Korenix MSR for fast recovery. The JetNet 5428G at the station-level connected with the 3rd party core switches by MSTP. Korenix NMS is a visualized management system for monitoring and control over large networks. It is used to report failures and helps the customer reduce troubleshooting efforts to a minimum.

# Application – Industry 4.0

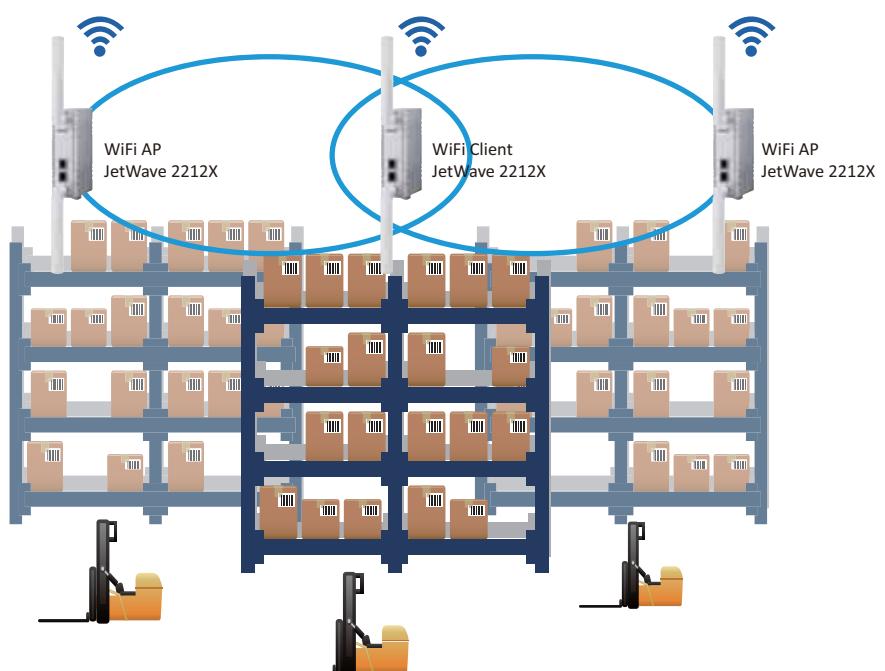

## Automated warehouse

Automated warehouse reduces the cost, time and accelerates efficiency. It is a good example of new industrial era. AGV(Automated Guided Vehicle) delivers goods through following the wire or marks on the floor in warehouses. It receives instruction, orders and provides the material status and operational condition back to the control center.

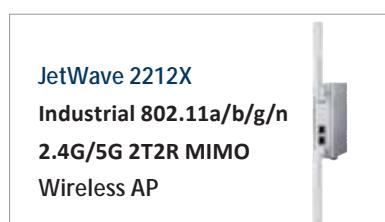

## Korenix Solution

An e-commerce company installed Korenix JetWave 2212X on the AGV. The biggest challenge is the roaming reliability. While AGV moving around, the WiFi client will roam to another AP if it is under its network coverage. Faster processing time can reduce packet loss during handover. JetWave was designed with a unique fast roaming mechanism with just 100ms roaming time. Ideal for automated warehousing and mobile related applications.

Another winning point is the compact size of JetWave2212X. It can move easily between the storage racks, and occupied not much space in AGV, which is designed to load goods.

## Applied Models

# Application – IIoT

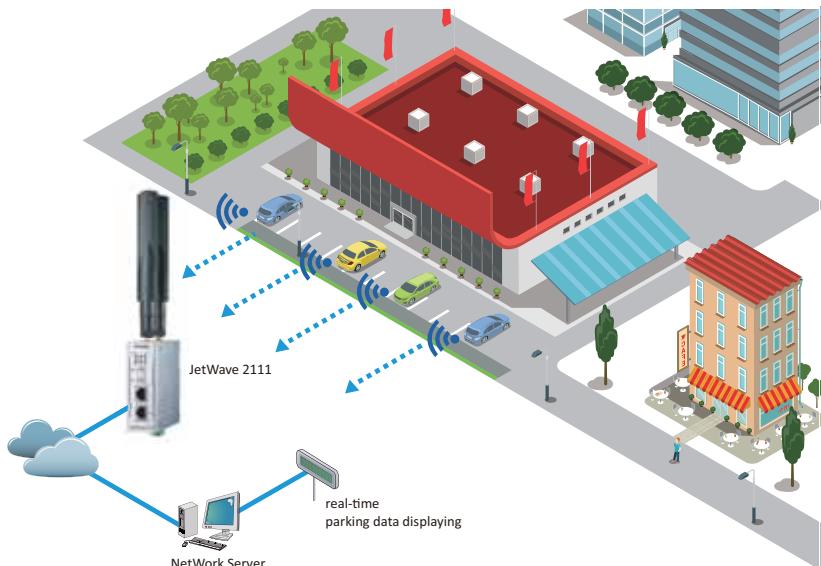

## Smart Parking

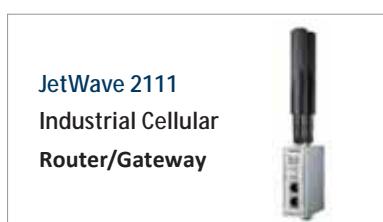

Smart parking is a popular topic in each city. Sensors installed in the parking lot to detect the real-time parking status, and the data will be updated to electronic signage. With the instant display of remaining parking spaces, it significantly eased congestion issue and air pollution by guiding drivers directly to find the vacant parking space.

## Korenix Solution

The data needed to be transferred from sensors is tiny. Therefore, JetWave 2111 – Low Data Rate Cellular Router, was chosen as the solution for data transmission. JetWave 2111 come with serial, Ethernet and LTE Cat.1 interfaces. It connected to the field sensors by serial port and transmit the data through LTE network. The LTE Cat.1 is with low bandwidth behavior – 10Mbps for download and 5Mbps for upload. The JetWave product cannot only transmit these small amounts of data stably, but also effectively save cellular communication costs.

## Applied Models

# Highlight Products – Industrial Switches

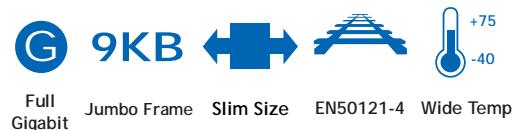

## JetNet 3205G / 3205GP Series

### Industrial Full Gigabit Unmanaged Switch

- 4 PoE ports compliance with IEEE802.3af/at standard with total power budget 120W (JetNet 3205GP series)
- Industrial Slim Size Design
- 9K bytes Jumbo Frame for large file transmission
- Power Event Alarm

Model Name	10/100/1000 Base-TX	1000 Base-FX
JetNet 3205G	5	
JetNet 3205GP	5 ( 4 PoE )	
JetNet 3205G-1F	4	1
JetNet 3205GP-1F	4 ( 4 PoE )	1

## JetNet 5210G

### Industrial 8FE + 2G RJ/SFP Combo Managed Switch

- 8 10/100TX, 2 Gigabit RJ/SFP combo ports
- Network Redundancy – MSR, ERPS, RSTP, MSTP, Super Chain
- Advanced Security – Port Security, IP Access list, SSH and HTTPS

## JetNet 5612G/7612G Series

Coming Soon

Model Name	10/100/ 1000 Base-TX	Giga Ports	Power Budget	Remark
JetNet 5612G-4F	8	4 SFP	Non-PoE	Layer 2
JetNet 7612G-4F	8	4 SFP	Non-PoE	Layer 3
JetNet 5612GP-4F	8	4 SFP	240w	Layer 2
JetNet 7612GP-4F	8	4 SFP	240w	Layer 3

## JetNet 5620G

Coming Soon

- 16G RJ + 4 Gigabit RJ/SFP combo ports
- Advanced Security system by Port Security, Access IP list, SSH, HTTPS Login, IEEE 802.1x / Radius Server authentication
- Advanced management by LACP/VLAN/GVRP/QoS/IGMP/ Private VLAN/QinQ/Snooping/Rate Control/Online Multi-Port Mirroring/DHCP

Model Name	10/10/1000 Base-TX	Giga Ports	Power Budget	Remark
JetNet 5620G-4C	16	4 Combo	Non-PoE	Layer 2

## JetNet 6828Gf

### Industrial 16G + 8G Combo + 4G SFP

### Gigabit Managed Switch

- 16 100/1000TX, 8 100/1000 RJ-45/SFP combo ports, 4 Gigabit SFP ports
- Advanced L3 – Static Routing, Dynamic Routing: RIP V1/V2, OSPF V1/V2, VRRP V2
- Advanced Cyber Redundancy –MSR, ERPS, RSTP, MSTP, SuperChain
- -40 to 85°C Operating Temperature

## JetNet 3810G V2 Industrial Booster PoE Switch

- Vehicle PoE: DC 8-32V, deliver 8 port PoE @48V
- IEEE802.3af compliant PoE: Total power budget is 80W with max. 15.4W per port

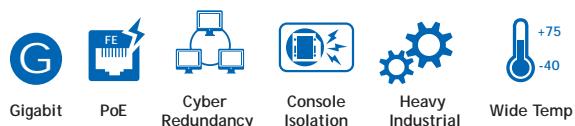

## JetNet 3808G-M12 Industrial 7FE + 1 GbE Un-Managed Booster PoE Switch

- 1 Gigabit/PSE M12 X-code, 7 100M/PSE M12 D-code, M12-A Power
- Power System design with 120W PoE budget and compliance with safety requirement
- Embedded DC 54V Booster
- Power Ignition Management
- -40 to 75°C Operating Temperature

## JetNet 5310G Industrial Gigabit Managed PoE Switch

- IEEE 802.3af 15.4W / IEEE 802.3at 30W High Power PoE
- 240W total power budget for High-power PoE camera
- SFP ports support 100/1000 Mbps with Digital Diagnostic Monitoring (DDM) to monitor long distance fiber quality

## JetNet 5810G

### Industrial 8FE + 2G Combo DC Booster Switch

- 8 10/100TX, 2 Gigabit RJ/SFP combo ports
- Total PoE Budget 240W @ 75°C ambient temperature
- Advanced Security system by Port Security, Access IP list, SSH, HTTPS Login, IEEE 802.1x / Radius Server authentication
- Advanced management by LACP/VLAN/GVRP/QoS/IGMP/ Private VLAN/QinQ/Snooping/Rate Control/Online Multi-Port Mirroring/DHCP

# Highlight Products – Industrial Converters

## JetCon 3701G

### Industrial Gigabit Ethernet PoE Media Converter

- Converts 10/100/1000TX to 100/1000FX
- Flexible SFP Fiber transceiver design
- High Power 30W PoE PSE Media Converter
- IEEE 802.3af / IEEE 802.3at Compliance
- Fault Alert for power
- Two way Link Loss Forwarding

## JetCon 1701GP-U

### Industrial Gigabit High Power PoE Injector

- 10/100/1000TX 1-port PoE Injector
- High Power 90W PoE power output
- IEEE 802.3af/at/bt Compliance
- Slim Case with IP-31 grade protection
- Industrial Slim Size Design
- Power Redundancy with 44~57V voltage input

# Highlight Products – Wireless Solution

## JetWave 2212 Series

### Industrial Wireless AP/Client

- 2T2R MIMO doubles data rate up to 300Mbps (JetWave2212G up to 867Mbps)
- Dual 24V DC Redundant
- 1 x Digital input design

Model Name	WIFI Standard	Ethernet Ports	Serial Port
JetWave 2212X	802.11 a/b/g/n	2x FE	
JetWave 2212S	802.11 a/b/g/n	2x FE	2 x Serial (RS232/422/485 3 in 1)
JetWave 2212G	802.11 a/b/g/n/ac	2x GbE	

## JetWave 2111 / 2411

## JetWave 2114 / 2414

### Industrial Cellular Router/Gateway

- LTE Cat 1 / Cat 4 technology, DL-MIMO
- One MicroSD card slot support
- RS232/422/485 3-in-1 (RJ45 type)
- 24V DC power input
- Passive PoE(JW2114/2414)
- GPS (Optional)

Model Name	LTE Category	Fast Ethernet Ports	RS 232/422/485	DI + DO	SIM Card
JetWave 2111	Cat 1 (max. 10M DL/5M UL )	1	1	1 DI + 1 DO	1
JetWave 2411	Cat 4 (max. 150M DL/50M UL )	1	1	1 DI + 1 DO	1
JetWave 2114	Cat 1 (max. 10M DL/5M UL )	4	2	2 DI + 2 DO	2
JetWave 2414	Cat 4 (max. 150M DL/50M UL )	4	2	2 DI + 2 DO	2

## JetWave 2111L/2411L Industrial Cellular Gateway

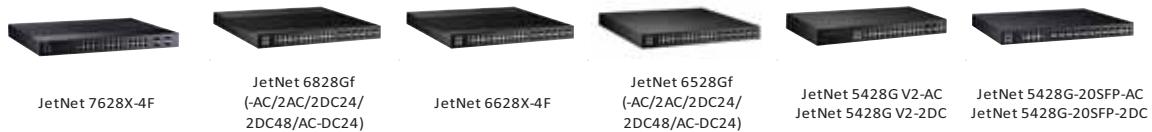

- JetWave2411L (LTE Cat 4) max. 150M DL/50M UL
- JetWave2111L (LTE Cat 1) max. 10M DL/5M UL
- 1 DI + 1 DO
- 1 Fast Ethernet Port
- 24V(9~48V) DC power input
- Metal housing

Model Name	LTE Category	Fast Ethernet Ports	RS 232/ 422/485	DI + DO	SIM Card
JetWave 2111L	Cat 1 (max. 10M DL/5M UL )	1	n/a	1 DI + 1 DO	1
JetWave 2411L	Cat 4 (max. 150M DL/50M UL )	1	n/a	1 DI + 1 DO	1

## JetWave 4110L Industrial LoRa Private Gateway

- LoRa Wireless data link provide stable data stream.
- High output RF Power and high sensitivity provide more than 40KM transmission distance.
- Multi-Interface support RS-485 / Analog or Digital Input / Digital Output.
- Resist the water, dust, temperature and shock and meet with the IP68 standard.
- Analog Input support 0~10 V / 4~20 mA / ADC
- Digital Output support PWM / Latch Mode.
- AUX I/O support remote setup/status inquiry function.

#### Standard

WIFI IEEE802.11a/g/n/ac

3G 3GPP Release 4,6,7

LTE 3GPP Release 8,9

#### Operating Frequency

2.4G WIFI FCC: 2.412~2.462GHz; CE: 2.412~2.472GHz

5G WIFI WIFI FCC: 5.170~5.250GHz and 5.745~5.825GHz, CE: 5.170~5.250GHz

3G GSM/GPRS/EDGE: Quad band 850/900/1800/1900MHz,  
UMTS/HSPA+: Five band 800/850/900/1900/2100MHz

LTE LTE-E: 800(20)/900(8)/1800(3)/2600(7)MHz

LTE-U: 700(17)/850(5)/AWS1700 and 2100(4)/1900(2)MHz

\*DI: Digital Input; DO: Digital Output

### Mobile Cellular Router / Gateway

Interfaces
