

VALUE GUIDE SKYAIR™ ACCESSORY

Reduce noise, emissions and clutter on the job site with the JLG® SkyAir® Workstation in the Sky® accessory. SkyAir eliminates ground based compressors that have separate transportation, maintenance and tracking costs. Get the most out of your SkyPower® equipped boom lift with the SkyAir package, an on-board air compressor accessory. The generator-powered 13 CFM rated (9 CFM delivered) air compressor is mounted under the hood to protect it from the elements and reduce the likelihood of theft. The compressor utilizes the airline, which is integrated into the boom lift's powertrack, and provides a platform mounted regulator for complete operation from the platform. An integrated airline reduces the potential dangers of an airline hanging over the platform rails and the associated replacement cost of damaged lines.

Versatility

For even more versatility and utilization, the SkyAir package provides the air source for the SkyCutter® accessory, an on-board Miller® plasma cutter. These accessories, combined with the 7500 watts of electric power supplied by the SkyPower generator and the available SkyWelder® accessory, provide the ultimate productivity solution for sheet metal, demolition, steel erectors and other applications to save time and increase productivity on the job site

Quantified Savings Per Month

Time (productivity) Savings	\$ 800
Damaged Air Lines (per incident)	\$ 100
Fuel Savings	\$ 100
Compressor Rental	\$ 250
Generator Rental	\$ 550
Estimated Monthly Savings	\$1,800

Time Savings

A platform-mounted regulator allows operators to adjust PSI without returning to the ground. Because the compressor is fully integrated, time spent moving a ground-based compressor around the job site is eliminated for a savings of up to one hour per shift, or approximately \$800 per month per operator.

Cost Savings

Save rental fees — a compressor rents for \$250 per month, plus delivery and pick-up charges. And save on fuel — the SkyAir package eliminates the need for fuel for a separate engine-powered compressor that can cost up to \$100 or more per month to operate.

Available on these JLG Models:

Telescopic Boom Lifts

400S, 460SJ, 600S, 660SJ, 600SJC, 800S, 860SJ

Articulating Boom Lifts

800A, 800AJ

VALUE GUIDE SKYAIR™ ACCESSORY

Specifications

Voltage: 13 CFM Rated, 9.3 CFM Delivered

Pressure: Adjustable up to 125 PSI

Tank Capacity: 10 gallons (turntable mounted)

Power Source: SkyPower, 230V (3-phase), single stage, 2 hp compressor

Filtration: Oil and water removal filter at the compressor with an additional water removal filter at the platform-mounted regulator

Compressor Location: Turntable mounted compressor regulated in the platform

Modes of Operation: AUTO — Generator runs as required to maintain pressure; disable by platform generator on/off switch.

CONTINUOUS — Generator runs continuously (proper mode for operation of SkyCutter) unless turned off by the generator on/off switch in the platform.

OFF — Generator will only operate with the on/off switch in the platform.
