

# QH SERVIS

We REPAIR SAMPLERS manufactured by EDMUND BÜHLER, EPIC , MONTEC and others.

We do warranty and post warranty servicing of our samplers. We have long experience in POST-WARRANTY SERVICING of EPIC, XIAN, XANTOS, PP92, PB-MOS, CALYPSO and other samplers. If original parts are unavailable, we are able to provide affordable replacement, or convert the sampler to newer system.

## CONVERSION OF OLDER SAMPLERS TO M99 SYSTEM

Upon demand from the users of other samplers that are not equipped with required features (external signal control via cable, flow-dependent proportional sampling, etc.), we perform conversions to time-proven system with configuration connector identical with M 99 samplers.

## SETTING AND SERVICING OF DETECTRONIC FLOWMETERS

We service, check and setup DETEC 3015 - Q-LOGGER, DETEC 3020 - Q-MONITOR and XYTEC flowmeters, or convert level measurement systems in these flowmeters according to current conditions. We are able to install additional external displays for measured variables.

## CUSTOMER APPLICATIONS

Following “Keep the customer satisfied” slogan, we are able to develop and manufacture “custom-tailored” devices. We have installed low-consumption water level logger with flow calculation, we have converted old flowmeters to new systems, etc.

## WATER QUALITY AND QUANTITY MONITORING

As a service, we are able to ensure flow monitoring in open systems using portable flowmeters logging flow velocity and level height in up to four profiles simultaneously. At the same time we may sample with automatic samplers. Monitoring results are delivered in printed and data formats.

## RENTING OF FLOWMETERS AND SAMPLERS

Upon agreement we provide long-term renting of monitoring technology (samplers and flowmeters) for negotiated prices.
