

## Assembly tiltable table

45.15

For the assembly of roller shutter boxes

### Operating range:

For the assembly of prefabricated roller shutter boxes onto window elements in the wood-, aluminium-, and PVC- window production.

### Technical model, standard:

- Working height: AH = 1020 - 1200 mm
- Working width: B = 2600 mm
- Working depth: AT = 600 - 1900 mm movable (motor-driven)
- Bottom of table: B1 = 1200 mm
- Height of roller conveyor: RH = 305 mm
- Width of roller conveyor: = 300 mm
- Pneumatic tilt installation with three tiltable cylinders controllable with hand valve 5/3 with automatic middle position

- Working surface covered with sliding strips
- Level reconciliation for different cabinet size from 50 to 200 mm adjustable with continuous roller shutter box tray

### Additional equipment:

- Sill recess »France«
- Feet valve 5/3 with middle position
- Pneumatically tiltable roller conveyor
- Working surface with continuously adjustable hand wheel with digital display or tape measure
- Mode of shipment: assembled
- Weight: 340 kg
