Membrane filters for all MBR Applications

**Municipal | Industrial | Maritime | Domestic**  
Waste Water Treatment

## our experience – your benefit

- Superb effluent quality due to complete particle separation
- Modular arrangement with easy stack & racking for flow and load adoption
- Robust Construction = long life!
- High Quality = Automated membrane module construction using robotic welding - not glued membrane panels for long life!
- Highest package density in all available flat sheet membrane systems
- Reduced power consumption
- No back wash required for operation
- Proven German technology = Unchanged for over 10 years with more than 12.000 FM filters worldwide in operation
- Complete filtration systems available as ready-to-connect units
- Worldwide Service network
- Excellent engineering support
