Vehicle Forensic Recovery Course

The ability to quickly identify vehicles and return them to their rightful owners can reduce costs for police forces in areas such as storage and litigation issues relating to the retention of a vehicle. With the loss of stolen vehicle resources throughout the UK, this course aims to re-introduce and re-train personnel cost effectively.

Who is the course aimed at?

The course will appeal to wide range of law enforcement personnel such as vehicle examiners, ports officers, RPU and rural crime officers, PCSO's or any LEO who is likely to come into contact with stolen vehicles.

Course coverage:

- Understanding health and safety protocols before, during and after re-etching
- Camera set up to photograph identification numbers
- VIN number casting using Isomark and evidence preparation of the cast
- Stamping effects on the molecular structure of metal
- Metal preparation for re-etching; steel, aluminium and cast iron
- Chemical or thermal restoration statement preparation.

Course cost per delegate - £250* ex VAT
 Certification costs - IMI - £22.00

Membership of IMI open to successful students.

*NOTE - registration and certification by governing body is additional to these prices and will vary depending on the governing body.

“A thorough and enjoyable course - Delivered with enthusiasm and knowledge.”

PC Martin Kerr (PSNI)

“Fantastic learning experience, which has given me the necessary tools for the identification of stolen vehicles.”

Mark O'Riordan (Garda)

“Intense but enjoyable and full of interesting information.”

Clive Harris (NFU Insurance)

Vehicle Identification Course

The ability to quickly identify suspect vehicles greatly enhances operational effectiveness and empowers individuals to make time critical decisions which impact financially on their employers. This course gives attendees the skills required and will also lead them into areas of evidence gathering for production at court.

Who is the course aimed at?

This course will appeal to a wide range of law enforcement frontline staff including intelligence staff and those using DVLA, PNC and other record keeping systems on a regular basis. Additionally of benefit to other agencies involved in the investigation of reported stolen vehicles, or vehicle related crime e.g. insurance, leasing and financing companies.

The course, developed following demands from agencies for greater understanding and confidence when stopping vehicles, aims to introduce students to the topic in a cost effective manner and covers most aspects of detailed vehicle identification both physical and photographic.

Course coverage:

- Nature and extent of vehicle theft in the UK and wider
- DVLA registration system
- Understanding / interpreting vehicle chassis number
- Use of PNC-VODS as an investigative tool
- 'PNC Corruption'
- Open source databases relating to vehicles
- Common 'ringing' methods. (Physical and paper)
- Recognition of fake or altered chassis numbers and plates
- Use of basic vehicle examiners tool kit
- Health and safety awareness re vehicle examinations
- Preliminary vehicle examination
- Written inspection report and evidential statement preparation.

Course cost per delegate - £350* ex VAT.
 Certification costs - IMI - £22.00

Membership of IMI open to successful students.

*NOTE - registration and certification by governing body is additional to these prices and will vary depending on the governing body.

“All very informative and relevant, Excellent course very enjoyable.”

PC Chris Gray (Northamptonshire)

“Excellent content. A huge amount to take in over the 2 days. Very worthwhile.”

Stephen Edwards (Dorset, Devon and Cornwall Vehicle examiner)

“Excellent we really need to involve more Insurance staff.”

Mark Cooper (AXA insurance)
