ABOUT US

Babacan Hydraulic Spare Parts Industry and Trade Limited was established in 1986 in Ostim Organized Industrial District to produce and sell hydraulic sealing machine parts and made to order rubber parts.

Our objective is to utilize the opportunities produced by the constant advancement in technology and in line with our research and development projects in order to improve our performance and product varieties.

With our 20 year experience in the rubber sector and our expanded use of natural rubber, EPDM, NBR (nitril), SBR, silicon (MVQ), viton (fkm, flourel), PU (polyurethane) as raw material, we produce concrete pump pistons, shock absorbers, engine mountings, upper shock absorbers (for breakers), couplings, bellows, diaphragms and seals, in addition to any type of specially ordered rubber.

Babacan Industry has ISO 9001 license. The quality of the products and their compatibility to standards is due to the use technology and developments, the use of high quality raw materials and the hard work of the employees. Quality is trust and continuity.

One of the most important characteristics of the Babacan Industry, which is one of the vanguards of technology and development in Turkey, is to serve your needs on time, with a professional work ethic and to follow the global market closely, which results in the constant expansion of its exports.

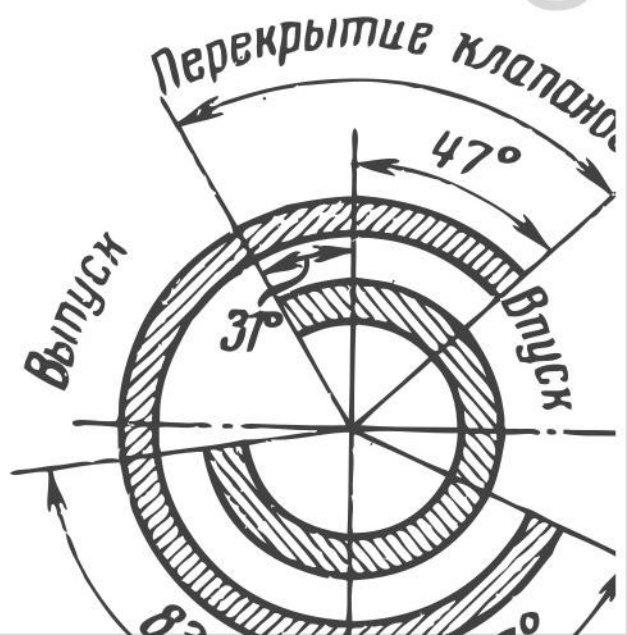

We invite you to share in our enthusiasm and future successes.

Best regards,
