YZRD 系列起重用绕线转子双速三相异步电动机 YZRD series wound rotor double-speed three-phase asynchronous motor for lifting

1、产品概述

1.1 YZRD 系列起重用绕线转子双速三相异步电动机，是为起重机的起升机构配套而开发的新型电动机。该电动机具有恒转矩调速特性，其高速极用于负载运行，低速极用于慢就位过程，具有起动平稳、变极切换电流小、机械冲击小、结构简单、使用方便等特点。该电动机的专利技术由于构思新颖、结构简单、实用性强，荣获第七届中国发明专利金奖。

1.2 YZRD 系列电动机，定子六根引出线；转子采用一套复合线圈线组，高速极设计可通过自身三个滑环外串阻抗；低速极转子绕组内部已接成回路，可自动呈现高阻抗，此时相当于鼠笼电机运行。由于在两种极数下转子都具有较高的阻抗，故既能保证较大的起动转矩和变极切换转矩，又能有效地限制起动电流和变极切换电流。

1.3 YZRD 系列电动机，其设计开发以 YZR 系列电动机结构为基础。外型尺寸及安装尺寸同相应机座号的 YZR 系列电动机。

2、使用条件

海拔不超过 1000m 能正常运行。F 级适用于环境空气温度在 -20℃ 到 40℃ 之间，H 级适用于环境空气温度在 -20℃ 到 60℃ 之间。相对湿度小于 90%。

3、基本形式

额定电压：380V

额定频率：50Hz

防护等级：IP44 或 IP54

绝缘等级：F 级或 H 级

冷却方式：风扇冷却 IC411 (H112-H280)、风机冷却 IC416 (H315-H355)

基准工作制：高速 S3-40%、低速为 S3-15% 或 S3-25%

安装方式：B3(160~355)、B5(160~250)、V1(160~250)

注：根据用户要求，可带超温保护开关、防潮加热带、电磁制动器及超速开关等，接受特殊协议订货。

4、冷却风机型式

额定电压：380V

基

频：50Hz

基准工作制：S1

风机有关技术参数见表 1

表 1 风机有关技术参数 (Table 1 Number of frame and centrifugal fan power)

机座号 Number of frame	315	355
离心风机功率、极数 power and pole of centrifugal fan motor	1.1kW 2 极	3kW 2 极

风机必须由独立电源供电。

1.General

1.1 YZRD series wound rotor double-speed three-phase asynchronous motor for lifting is a new type motor developed as a complete set of the lifting units of the crane. The high-speed electrode of the motor is used for running with load and the low speed electrode for the slow positioning process and it has the characteristics of stable starting, small switching current, small mechanical shock, simple structure and simple operation and so on.

1.2 The stator of this motor has 6 leadouts; the rotor adopts a set of compound coil line set and the design of the high-speed electrode can be carried out through three external slip rings; and the low-speed electrode rotor winding has been connected into a loop and the high impedance can automatically appear, at this time, it is equivalent that the squirrel cage motor runs. Since the rotors at both electrodes have high impedance, which can ensure a larger starting torque and the switching torque as well as effectively limit the starting current and the switching current.

1.3 The develop of YZRD series motor is based upon YZR series motor, and the outline dimension and installation dimensions of the motor is same to YZR series.

2. Operation condition

The motor can run normally when the elevation not more than 1000m. The environment temperature for class F is from -20 to 40 Celsius degree, for H class from -20 to 60 Celsius degree. Relative humidity less 90%.

3. Basic mode

- rated voltage : 380V rated frequency: 50HZ.
- protection grade : IP44 or IP54 insulation level: F or H
- cooling mode: IC411 (H112-H280) 、 IC416 (H315-H355).
- base operating duty : S3-40% for high speed , S3-15% or S3-25% for low speed
- install mode: B3、 B5、 V1

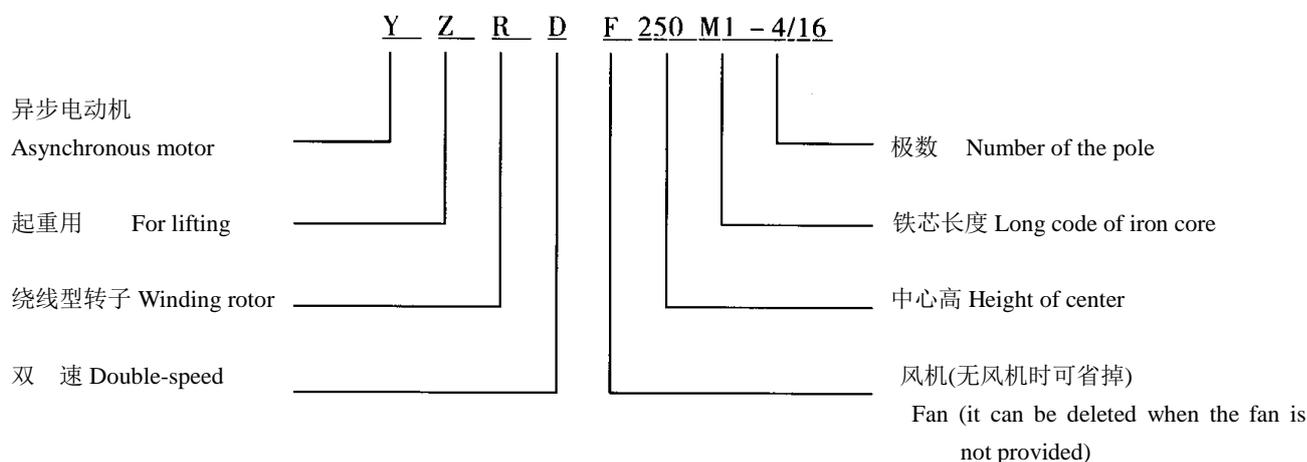

Note: The motor with over-temperature protection、anti-condensation heater、brake and over-speed protection switch can be made according to the requirements of the users, and acceptance of the special ordering.

4. Cooling fan

- rated voltage: 380V.
- rated frequency: 50Hz,
- base operating mode : S1
- The power of drive motor shown in table1 and table 1.

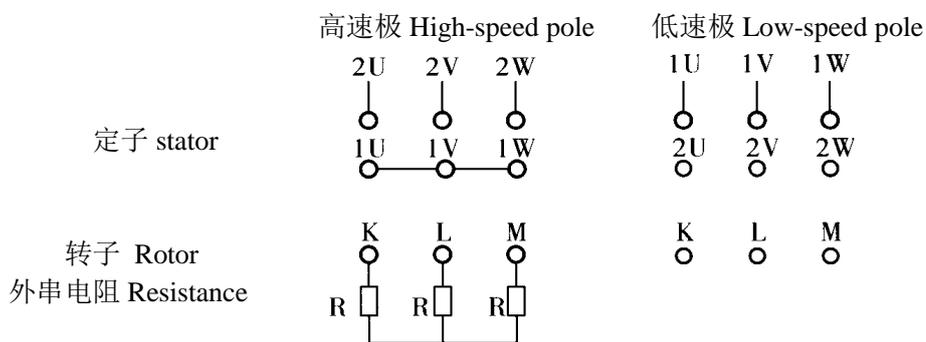

Fan must be powered independently!

5. 电动机型号意义 Significance of motor model:

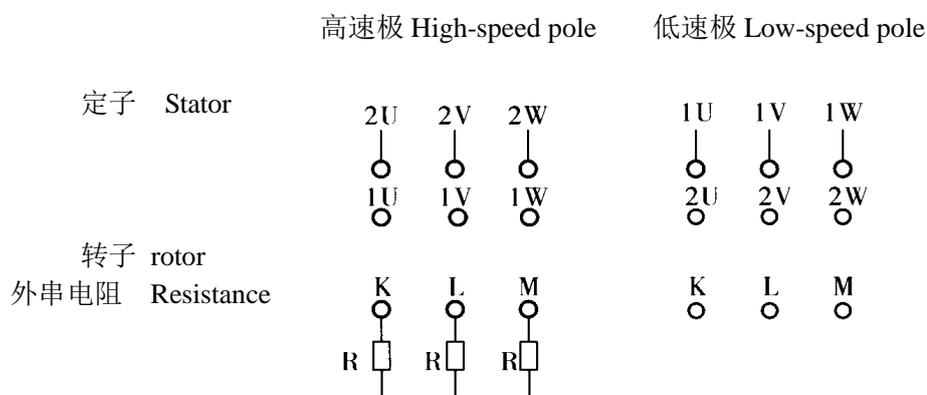

6 电动机接线图见下图 connection diagram of the motor is shown in the following figure.

定子一套绕组的电动机

定子两套绕组的电动机

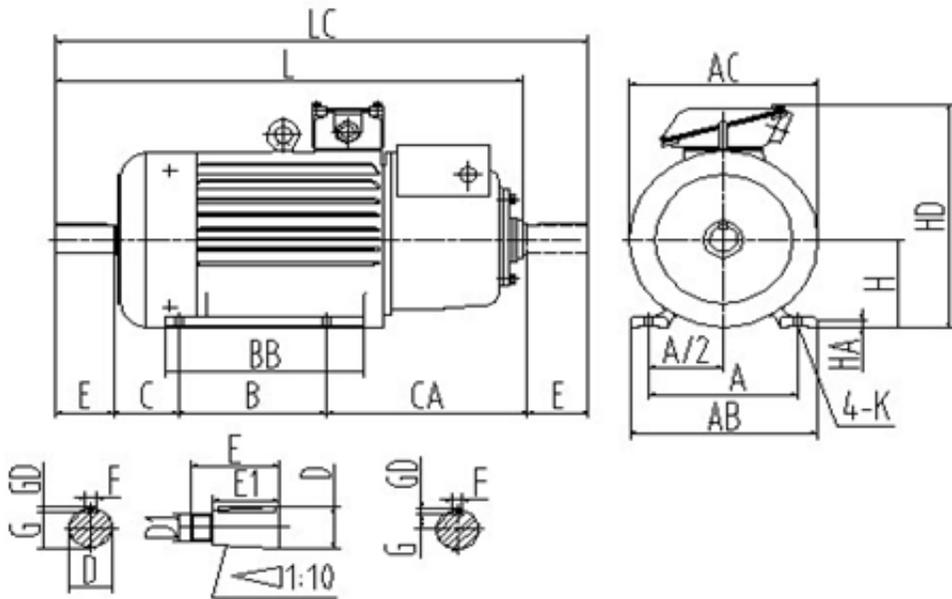

7.电机性能参数见表 2

7.the parameter of motor shown in table2
