

3-Phase SCR Power Control Panel

- Color Touchscreen Operator Panel
- 8 Points of Temperature Monitoring
- Temperature & Alarm Display for all 8 Temperature Sensor Inputs
- 4 Control Modes: Single Loop, Temperature Differential, and 2 Cascade Modes
- Temperature Range Selection of 0-250°F, 0-500°F, 0-1000°F, 0-1500°F, 0-2000°F
- Programmable Setpoint Ramping
- Adjustable Deadband and HI-HI, HI, LO, & LO-LO Setpoints for each point
- Input Sensor Type, Engineering Unit, & Open Sensor-Selection (in groups of 4)
- Ground Fault Alarm / Trip, adjustable from 30 - 300mA with Graphical Trending
- 4 Alarm Outputs, Programmable as Normally Open or Normally Closed
- Temperature and Discrete Alarm Mapping to any of the 4 Alarm Outputs

Chromalox®
PRECISION HEAT AND CONTROL

Description

While basic low cost temperature controllers may be appropriate for some process heat applications, most require more sophisticated control systems. With the Chromalox IntelliPANEL™ you'll have the benefit of advanced diagnostics, trending, and monitoring right at your fingertips. This revolutionary new concept in process/power control utilizes touch-screen programming technology.

With simplified configuration settings and local monitoring, set-up time is greatly reduced. Users have quick access to measurement instruments, alarm configurations, control algorithms, start-up, and troubleshooting. IntelliPANEL comes loaded with standard features. It brings the power of several instruments to your application: voltmeters, ammeters, wattmeter, watt/hr meter, ground fault monitoring and trending,

man-machine interface, six-pen chart trending, communications, resistance monitoring, temperature alarms, SCR Power Control, and four selectable process algorithms, including a remote 4-20 mA input for customer supplied command signals.

The advanced IntelliPANEL design provides standard panel ratings from 100-1200 amps with voltage ratings of 208, 240, 380, 400, and 480 Vac three-phase power. In addition to the IntelliPANEL Central Control Unit, Chromalox' patented MaxPac SCR power controllers feature built-in power distribution, selectable single/three-cycle resolution and an electronic heat sink temperature monitoring and warning system. Chromalox DOT variable time-base firing provides uniform heating which ensures increased heater life by reducing thermal shock.

Additional Features

- 4 User-Definable Discrete Interlocks including 1 with Time-Adjustable Delay
- 20 Character Text Entry Identification for all Temperature Inputs and 16 Character Text Entry Identification for all Interlocks
- 4 Levels of Security with User-Defined Numeric Passwords
- Programmable Setpoint Entry Range Limits
- Programmable Open Sensor Protection
- Virtual Six-Pen Trending Chart
- Alarm History Logging
- Time and Date Stamp on Alarms
- RS-485 / 422 Configurable Network Communications with option for MODBUS, Device Net, Profibus, and Ethernet
- Languages - Multiple Language Options
- NEMA 12 Enclosure Construction
- Operating Environment 32 - 104°F

IntelliPANEL™ 3-Phase SCR Power Control Panel

Smart Control Options

Chromalox understands your need for temperature sensing that meets application requirements. In addition to a "smart" display, IntelliPANEL provides smart control options. IntelliPANEL offers four selectable control algorithms: Single-Loop PID, Differential, Cascade Process to Sheath, Cascade Outlet to Sheath, and an input for a customer supplied 4-20 mA remote command signal. These options include selectable manual or auto-tuning.

Security

IntelliPANEL offers four levels of security with user-defined numeric passwords: Manager, Engineer, Supervisor, and Maintenance.

Monitoring and Alarming

The IntelliPANEL system has the ability to monitor up to eight temperature inputs for any one of four conditions: HI-HI, HI, LO, and LO-LO alarms. Additionally, each alarm can be programmed as either latching or non-latching, and can be mapped to any or all of the four alarm outputs. All IntelliPANEL alarms are identified and logged with time/date stamp, count, and action taken.

ALARM COUNT		
ALARM	COUNT	MESSAGE
001	00000	Shorted SCR
002	00000	Ground Fault Detected
003	00001	Heatsink Over-Temperature Detected
004	00000	High Temperature Limit Trip
005	00001	Threshold Temperature not cleared
006	00000	Input 1 > Hi Temp Alarm
007	00000	Input 2 > Hi Temp Alarm
008	00000	Input 3 > Hi Temp Alarm
009	00000	Input 4 > Hi Temp Alarm
010	00003	Input 5 > Hi Temp Alarm
011	00000	Input 6 > Hi Temp Alarm

018	00003	Input 5 > Hi Temp Alarm
019	00000	Input 6 > Hi Temp Alarm

ALARM HIST PAGE UP PAGE DOWN LINE UP LINE DOWN CLEAR CLEAR ALL EXIT

IntelliPANEL™ 3-Phase SCR Power Control Panel

Status Panel Board

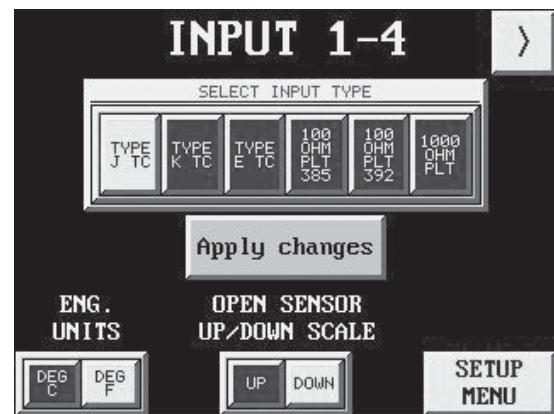

In addition, to the temperature alarms, there are eight status indicators for key system elements. These indicators include Alarm Input 1 (or Purge Alarm), Alarm Input 2, Ground Fault, Disconnect Switch Status, Breaker Status, Heatsink Over-Temp, SCR Status, Hand / Off / Auto Status, and High Limit status.

A pop-up System Master Screen is automatically displayed any time a shutdown event occurs within the system. The shutdown conditions are listed on the System Master and the event(s) that caused the shutdown are indicated by flashing red text.

Sensor Inputs

IntelliPANEL offers eight temperature inputs which can be programmed for thermocouple or RTD sensor types. Temperature inputs in the IntelliPANEL system are configured in groups of four. Thermocouple inputs can be configured as: J, K, or E thermocouples. RTD inputs can be configured as either 100 ohm Platinum 385, or 100 ohm 392, or 1000 ohm. The IntelliPANEL System supports both Celsius and Fahrenheit units of indication along with Up-Scale or Down-Scale sensor burnout.

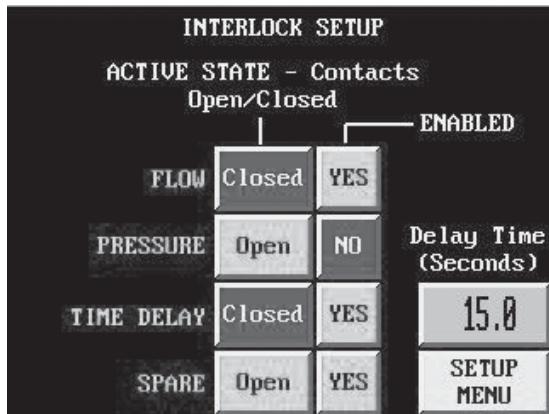

Tagging

All eight temperature inputs have text identification fields that allow the user to name the sensors for ease of recognition. The character fields are each 20 characters long and will accept alpha-numeric data.

IntelliPANEL™ 3-Phase SCR Power Control Panel

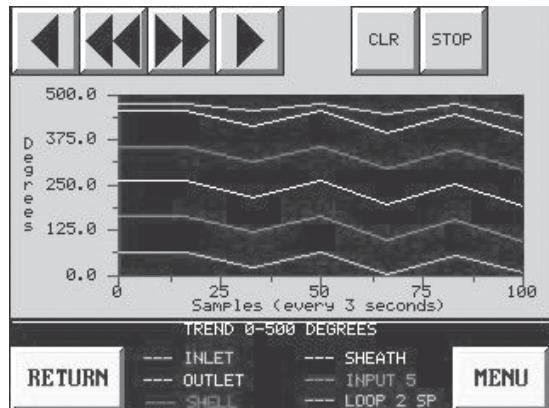

Interlocks

IntelliPANEL offers four programmable process interlocks with a text identification feature. The interlocks can be programmed for flow, pressure, Time Delay or any variable required for your process. All interlocks can be Enabled or Disabled and can be programmed for an Open / Closed logic state.

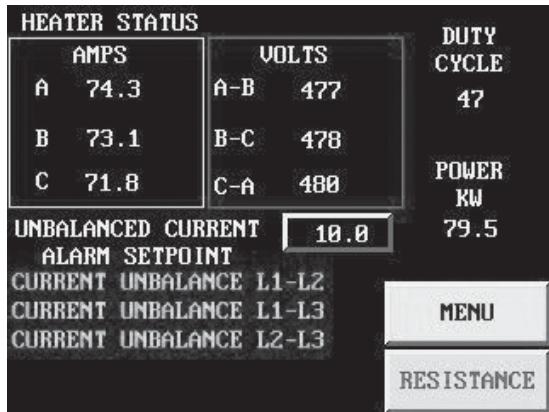

Trending

IntelliPANEL offers two virtual trending monitors. The six pen temperature trending monitor is a visual indication of your system status: cabinet temperature, ambient temperature, heater inlet/outlet temperatures, heater shell temperature, and process set-point. Additionally, IntelliPANEL trends system ground fault leakage.

Real-Time Process Indicators

IntelliPANEL offers Continuous Built-In Monitoring on Heater Duty Cycle, Power in Kilowatts, Kilowatt/Hr, Element Resistance, Time/Temperature, Ground Fault Monitoring, Volts/Phase, and Amps/Phase,

intelliPANEL™ 3-Phase SCR Power Control Panel

Specifications

INPUTS:

4-channel RTD input module

Input Ranges

Type Pt100 -200.0/850.0°C, -328/1562°F
Type Pt1000 -200.0/595.0°C, -328/1103°F
Type jPt100 -38.0/450.0°C, -36/842°F

RTD Excitation Current 200 µA

Notch Filter >50 db notches at 50/60 Hz

Maximum Setting Time 100 ms (full-scale step input)

Common Mode Range 0-5 VDC

Absolute Maximum

Ratings Fault protected inputs to ± 50 VDC

Sampling Rate 140 ms per channel

Notes:

1. The three wires connecting the RTD to the module must be the same type and length. Do not use the shield or drain wire for the third connection.
2. Unused channels require shorting wires (jumpers) installed from terminals CH+ to CH- to COM to prevent possible noise from influencing active channels.
3. If a RTD sensor has four wires, the plus sensor wire should be left unconnected.

4-Channel Thermocouple Input Module

Input Ranges

Type J -190 to 760°C (-310 to 1400°F)
Type E -210 to 1000°C (-346 to 1832°F)
Type K -150 to 1372°C (-238 to 2502°F)

General Specifications

Number of Channels 4, differential

Common Mode Range -1.3VDC to +3.8VDC

Common Mode

Rejection 100dB min. @ VDC 50/60Hz.

Input Impedance 5M

Absolute Maximum

Ratings Fault-protected inputs to ± 50 VDC

Update Rate 4 channels per scan

Open Circuit Protection Upscale or Downscale

Display Resolution ± 0.1°C or ± 0.1°F

Cold Junction Compensation Automatic

Conversion Time 270ms per channel

Warm-Up Time ... 30 minutes typically ± 1°C repeatability

Linearity Error

(End to End) ± 1°C maximum, ± 0.5°C typical

Maximum

Inaccuracy ± 3°C (excluding thermocouple error)

Linearity Error (All Input Ranges) 0.05% @ 0-60°C;

Typical: 0.03% @ 25°C

Notes:

1. Shields should be grounded at the power source only.
2. All CH- terminals must be connected together.
3. Unused channels should have a shorting wire (jumper) installed from CH+ to CH-.

Permissive Digital Inputs:

All Dry contact or triac rated for 120 Vac at 20 mA.

Relay Output Specifications

Output Voltage Range 6-240VAC, 47-63Hz, 6-27 VDC

Maximum Voltage 264VAC, 30VDC

Maximum Current 2A/point

Maximum Leakage Current 0.1mA @ 246VAC

Smallest Recommended Load 5mA @ 5VDC

Relay Operating Cycles:

Voltage and Type of Load	Load Current 1A	Load Current 2A
24 VDC Resistive	600K	270K
24 VDC Solenoid	150K	60K
110 VAC Resistive	900K	350K
110 VAC Solenoid	350K	150K
220 VAC Resistive	600K	250K
220 VAC Solenoid	200K	100K

intelliPANEL™ 3-Phase SCR Power Control Panel

Specifications (Cont'd.)

Touch Screen Display:

Screen Size 5.7 in. dia.
Resolution 320 x 240
Touch Grid 8 x 6

Communications:

Protocol ModBus Slave
Physical RS-422 4 wire
RS-485 2 wire
Baud Rate 2.4, 4.8, 9.6, 19.2, 38.4 Kbaud
Stop Bits 1 or 2
Parity odd, even, none
On Delay 5, 10, 20 ms.
Address 1 - 128
Max. network distance 4000 feet
Max. number of devices 32 per network
Max. baud rate 38.4 Kbaud
Max. driver load 62 ohms
Driver voltage ±1.5V minimum
No load current 80mA
Max. current 100mA (62 ohms)
Isolation resistance >1014 ohms/7pF
Voltage withstand 1.2KVrms/1s, 1.0KVrms/1 minute
Termination Dipswitch selectable
Bias resistors Dipswitch selectable
RS485/RS422 Operation Dipswitch selectable
Connections Plug in removable terminals
for field termination

CONTROL AND ALARM

Control Modes: Single Loop PID
Differential PID
Cascade PID/PID

PID Parameters:

Proportional Band 20 to 2000 degrees
Reset 0.61 to 60 repeats per minute
Rate 0 to 99.99 seconds
Reset Windup Limit 100% fixed
Rate Limit X10 fixed
Manual Output 0 to 100%, 1% steps
Control Setpoint full range, 0.1 deg. setting
Setpoint Limits high and low full range, 0.1 deg setting
Alarm Setpoint full range, 1 deg. Setting
Alarm Deadband 0 to 50.0, 0.1 deg. Setting
Ramp to Setpoint 0 to 2000 deg. per minute,
1 deg. setting

Time delay on interlock 0 to 9999 seconds, 1 second
settable

Ground Fault Monitor

Trip setting range 6 to 600 mA
Current indication 0- 100% of trip set point

Password: 4 levels settable

Time: 24 Hr. clock hrs/min format

Date: mon/day/yr format

Power Train Components

Main Disconnect Switch load rated shunt trip
I²T fusing > 125% load with 100 kaic
Load Circuit Breakers >125% load rated with 25 kaic
Contactors (if supplied) load rated
