

bisoft BDE

Production Data Recording

Time and cost-transparency
at the press of a button

bisoft BDE

bisoft BDE records and evaluates data accrued during operational production processes. Transparency is thus guaranteed right down to individual items on the parts list.

Production staff record individual work processes, set-up times and quantities on a recording terminal – per barcode and/or via touch-screen. Recorded times immediately flow into calculation and controlling – final costing and target/actual performance calculation are possible at all times.

Processing transparency with up-to-date project progress.

Advantages at a glance:

- Immediate effect on controlling and final costing
- Target/actual performance comparison possible at all times
- Comprehensive reporting according to your requirements
- Data transparency and administration for quality security and ISO 900x certification
- Current production key figures (KPI)
- Interactive factory hall monitoring
- Stationary and mobile recording can be combined individually
- Optional connection to PPS/ERP and HR
- Clear-cut structures – simple menu navigation

BDE OVERVIEW:

bisoftBDE – Interfaces

- PPS/ERP: SAP, Baan, Navision, proAlpha, Infor, Infra, DIESTEIN, Mitan, ...
- Integration via ODBC into the realm of MS Office
- HR/Wages: Paisy, Datev, SoftResearch, IBM, Varial, Sage, ...
