# FLEXIBLE PIPE CONNECTIONS, PREMIUM CLASS.

For pipe construction, you will need compensators – to absorb thermal expansion, to reduce vibration and noise.

Our 'ERV' rubber expansion joints have reliably performed these tasks – since 1956.

Due to their construction and premium quality, our expansion joints have become international industry standard.

This brochure gives an overview of technical features and helps to choose the right product for your needs.

### **CONTITECH – CORE COMPETENCE IN RUBBER BELLOWS**

#### **CONTITECH.** Engineering Next Level

As a driver and inspiration for new, cutting-edge technologies and an expert in materials and processes, we at ContiTech remain circumspect and considered as we take things to the next level - in every respect.

We keep a close eye on changes and trends in society and technology so we can adapt appropriately to provide market-focused solutions for the benefit of our customers and of people around the world.

As an innovation leader in natural rubber and plastic products, we are a major driving force behind the future viability of our partners - thanks to our wealth of expertise in materials and processes, which we have gathered over the decades. We are quick to offer the markets the solutions they need - always aiming for the top in quality, speed and service.

- Well-founded materials competence
- Long-standing development know-how
- Global support
- Flexible in production
- Top references

#### **Rubber Bellows for Expansion Joints**

Expansion joints are parts of piping systems for fluid and gaseous media. The production of rubber bellows for expansion joints belongs to the ContiTech business unit Air Spring Systems as both are similar rubber bellow products with textile reinforcement.

#### Types

13 different qualities

#### Sizes

DN 32-DN 1000 mm, various lengths

#### **Operating Pressure**

PN 10-25 bar, depending on size and type

#### **Temperature Range**

-40 °C to +130 °C, depending on rubber quality

Fluid Technology

Power Transmission

**Vibration Control**

## ELAFLEX – EXPERIENCE YOU CAN RELY ON

Elaflex is a specialist company in safe connections for refuelling and pipe equipment.

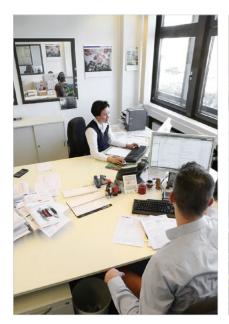

Since 1923 we stand for values which are typical of a family owned company: The spirit of innovation, reliability, continuity and flexibility in thought and action.

ERV expansion joints, co-developed with ContiTech, are an important part of our product portfolio.

The rubber bellows, co-developed with ContiTech, are manufactured in Germany and assembled and distributed by Elaflex.

We are a committed partner to our customers who count on quality engineered and durable products. Choosing ERV expansion joints is a sound investment both in terms of performance and total cost of ownership.

#### Service and Added Value

Elaflex customers appreciate service factors such as professional technical advice, reliability, up-to-date online product information and global support by local Elaflex distribution partners.

Service also means the ability to supply a major part of our product range ex works with short lead times. A large 4500 sqm warehouse and a 1350 sqm workshop result in an efficient delivery capability. More than 25.000 bellows and a large number of flanges and accessories are permanently available ex stock.

According to customer specification, we supply the assembled product. Our modular system, developed over the years, is important both for efficiency and for

06 | Elaflex Rubber Expansion Joints

safe assembling. Bellows, flanges and accessories always come from one source only and to the latest industry standards. The combination of both modular system and control over the whole production chain safeguard that everything fits perfectly.

Our operational procedures also translate into better service. An up-to-date warehouse management system helps for good inventory accuracy and confirmation of readiness for delivery to the customer. Further, a 'pick by voice' and barcode-assisted stock management minimise the possibility of incorrect deliveries and speeds up the delivery process.

## WHAT ARE RUBBER EXPANSION JOINTS?

Rubber expansion joints are flexible connectors for the construction of pipe systems.

They relieve system strain by reducing vibration and noise and compensate static or dynamic movements caused by thermal change, load stress, pumping surges or construction settlement.

They also compensate assembling inaccuracies (misalignment during installation) and can be used as pipe insert pieces to facilitate inspections.

Standard length

Axial elongation

Angular offset

Axial compression

Lateral offset

Vibration

### Comparing Metal Expansion Joints with Rubber Expansion Joints

#### Rubber expansion joints

- show no fatigue failure due to high frequencies of vibration
- are not endangered by stress corrosion cracking due to their higher flexibilty
- are suitable for a larger range of media due to their available type variety
- will absorb outer physical influences, e.g. accidental impacts without any damage
- can be used to protect the pipework against high shock
  stress
- offer max. movement ranges, at the same time they are very compact (short installation length)
- are suitable to substantially reduce vibration and noise

### WHY YOU SHOULD CHOOSE ERV.

ERV expansion joints from Elaflex are moulded single sphere type rubber bellows with swiveling metal flanges. Their construction and lengths (installation sizes) have since become internationally recognised standard.

Premium products have their price. But the additional cost for ERV will pay off for the operator in the long run.

The calculation: For a defined period (e.g. 15 years), all direct and indirect costs for a product application with expansion joints are determined and added.

Cost factors include the initial product price, shipping, indirect acquisition expenses, effort for installation and inspection. Most important, the expected lifetime until replacement shall be reflected - including the often non considered costs arising from product failure: plant downtime, environmental damage and replacement cost.

We claim that - due to their superiour lifetime - ERV show the lowest Total Cost of Ownership, for the major part of applications.

Assuming proper installation and operation within their admissable operating limits, they are trustworthy components for engineers and purchasers who think and calculate in long terms.

#### **Optimal Shape and Construction of the Bellows**

- Large axial, lateral and angular range of allowable movement, no double sphere necessary
- Low reaction forces and low inherent resistance
- Noise dampening: the major part of the piping's structure-borne noise and the low-frequency noise generated by fluids is eliminated
- Vibration dampening: ERV efficiently absorb vibrations caused by engines, turbines or compressors

#### Experience and Know How

- Applications since 1956
- Useful division of labour and competence between ContiTech, one of the leading international rubber product manufacturers (bellows production) and Elaflex (know-how regarding flanges, accessories, assembling, certification, testing and distribution)
- Consistent suppliers and manufacturing methods ensure a constant quality

#### **Customer Focus**

- Large warehouse of bellows (>25.000 bellows permanent stock) and flanges/accessories ensure short lead times for standard types
- Technical service: professional advice, documentation, testing certification (audited to European Pressure Equipment Directive)
- Online ERV configurator: ervconfigurator.elaflex.de helps to find and visualize the required product in a few seconds
- Global support by local Elaflex distribution partners

#### Warranty

- Warranty period of 24 months
- Consistent quality results in a neglectable claim rate
- Each examination is free of charge, not depending on the result

#### **Easy Installation**

- Swiveling flanges and smooth bolt holes make assembling easy
- The highly flexible bellow eases installation in problematic locations

#### **Superior Life Time**

- HiTech rubber compounds from ContiTech
- Physical properties of compounds and reinforcements are optimised for each bellows type: elongation at break, ozone and UV resistance, cold flexibility, tensile strength, volumetric extension etc.
- Permanent testing of raw material properties before and during production
- Rubberized reinforcements for superior adhesion of all layers
- Integrated sealing surface with type matched steel wire core
- Made in Germany, Elaflex/ContiTech quality pilosophy
- High operational safety, 1:4 safety factor regarding burst pressure

#### Large Product Range

 Variety of 13 different types, sizes 1" – 40" (DN 25 – 1000 mm), various lengths and a vast choice of flange type / material and accessories

#### The Bellows

- International quality reference for some applications,
  e. g. ERV-G for tank trucks (fuels), ERV-R for drinking water, ROTEX for heating systems, ERV-OR for LP Gas
- Some unique products such as ERV-GS (ship engine room type approved), ERV-GS HNBR (large application range, temperature, abrasion & fire resistant), ERV-G LT (low temperature down to -40°C)
- Efficient due to standardised bellows lengths

#### Flanges

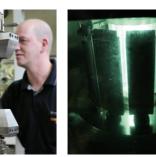

- Modular system flanges match with all bellows
- Certified materials, EN 10204-3.1
- Standard types with stabilising rim
- Marked with size, standard, material, manufacturer
- Cr (VI)-free corrosion protection for steel flanges long-lasting and environmentally friendly

#### Certificates

 Various ERV types are certified for civil and navy ship construction, drinking water, foodstuffs, heating and gas supply installations

### **CONTITECH – BELLOWS PRODUCTION**

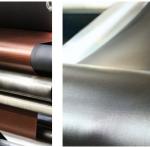

### ELAFLEX – ERV ASSEMBLING & TESTING

## CHECKLIST FOR EXPANSION JOINTS

If you are not sure about the required type, execution and flange material, going through this checklist helps us to quote according to your needs.

#### 1. Medium

- Chemical composition
- Gaseous, liquid, paste-like
- Abrasion by soldid particles expected

#### 3. Operating Site

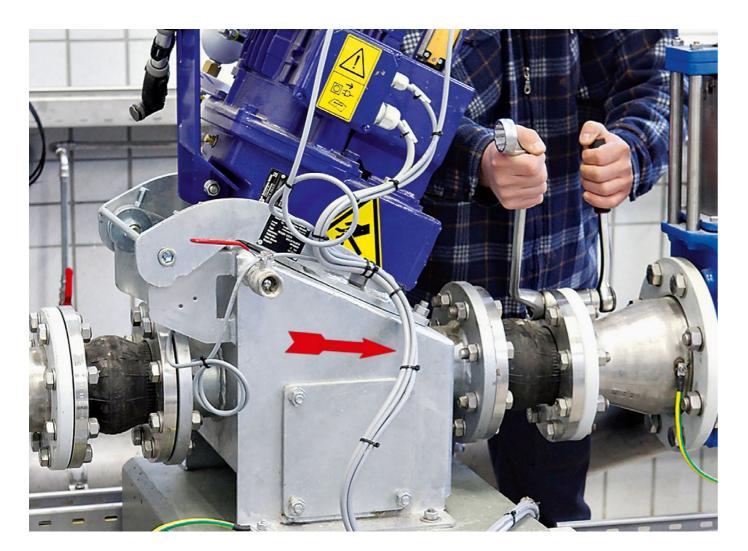

- Indoor or outdoor
- Exposure to sunlight (UV)
- Salt-containing atmosphere

#### 2. Operation Conditions

- Minimum/maximum temperature
- Maximum pressure/peaks/load changes
- Vacuum possible
- Axial range of movement (elongation/compression)
- Angular Load
- Lateral offset

#### 4. Certificates and Testing

• Required certificates and/or testing, e.g. to European Pressure Equipment Directive

## **ERV CONFIGURATOR**

Many options, fast choice: The online ERV configurator ervconfigurator.elaflex.de helps to combine bellows, flanges and accessories.

- · Choose bellows type,
- Size (DN) and length,
- Flange standard and material,
- Movement limiters and accessories.
- Direct enquiry possible.
- Save link or PDF on your computer if required.

### **ERV PRODUCT RANGE**

ERV high quality expansion joints DN 25-1000 by Elaflex/ContiTech. With swiveling flanges (various types and materials). For detail information see Elaflex catalogue.

### ERV-R

RED BAND expansion joint for water, drinking water, waste water, seawater, cooling water, chemical waste water (without oil), chemicals, acids and alkalis, salt solutions, alcohols. Temperature range -40°C up to 100°C,

temporarily up to 120°C. Lining Butyl/EPDM.

Type ROTEX

ROTEX

#### ERV-BR

Type ERV-R

BR expansion joint for abrasive media such as sludges, solid/liquid mixtures, dustlike and powdery products. Temperature range -50°C up to 70°C, temporarily up to 90°C. Lining BR/NR.

#### ERV-GS

YELLOW STEEL expansion joint. Similar to type ERV-G, but fire resistant to ISO 15540 (type approved). Temperature range -20° C up to 90° C, temporarily up to 100° C. Lining NBR.

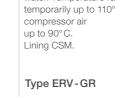

#### ERV-OR

ORANGE BAND expansion joint for Liquid Petroleum Gas (LPG) according to EN 589. temperature range -20° C up to 90° C. Working pressure 25 bar, burst pressure > 100 bar. Lining NBR.

Accessories

- Tie rods with outer limitation (...ZS)
- Tie rods with inner and outer limitation (...ZSS)
- Angular limiter (... RG)
- Inner protection sleeve stainless steel (... SR)
- PTFE liner (... TA)
- PTFE liner and vacuum support ring (... TAS)

ROTEX expansion joint for permanent service with heating water, cooling water and hot air (without oil). W.P. 10 bar up to 100°C, 6 bar up to 110°C. Temperature range -40° up to 130°C, temporarily up to 150°C. TÜV approved for heating installations. Lining EPDM.

#### ERP

cold/warm water, swimming pool water, seawater, drinking water. Highly flexible + low own resistance. W.P. max. 10 bar. Temperature range -40°C up to 90°C, temporarily up to 120°C. Lining Butyl / EPDM.

Type ERP

#### **ERV-GS HBNR**

troleum based products up to 50% aromatics and hydraulic oil. Very good ageing, weathering and ozone resistance. Temperature range -35°C up to 100°C, temporarily up to 120°C. Lining HNBR.

Type ERV-GS HBNR

#### ERV-GR

chemicals and aggressive chemical waste water. Temperature range -20°C up to 100°C, temporarily up to 110°C. For oil contaminated

- - Vacuum support ring stainless steel (... VSR)
  - Bolted vacuum support ring stainless (... VSRV)
  - Flame protection cover ( ... FSH)
  - Flame protection cover Naval Standard (... FSH-M)
  - Earth Cover (... EAH)
