

Mobile Gantry Crane 2000 [2000kg]

This lightweight aluminium gantry crane provides mobility and stability when lifting 2 tonne loads up to 3.2 metres high in extremely confined spaces.

This gantry is perfect for handling heavy loads in a range of environments, from a craftman's workshop to plant and boiler rooms. Easily manoeuvred into position thanks to its 360° swivel locking castor wheels, it is an ideal lifting solution for awkward applications such as machinery installation and automotive repairs.

The Mobile Gantry Crane 2000 can be manually set up and dismantled in a matter of minutes, using just four bolts to fix its rigid structure together. Includes 1 standard trolley and 1 chain block. Weight: 133kg.

Mobile Gantry Crane 3000 [3000kg]

The flexible and versatile Mobile Gantry Crane 3000 can be adapted to suit a wide range of heavy-duty lifting tasks as its height can be quickly adjusted between 2.2 metres to a maximum of 3.2 metres.

The 3 tonne capacity gantry comes with a 4.57 metre beam length and is suitable for working in a range of locations including cemeteries, marinas, galleries, museums and exhibition centres.

Lightweight enough to work in areas with floor capacity restrictions, the Mobile Gantry Crane 3000 weighs just 190kg and is made of corrosion resistant anodised aluminium so it can be easily washed down for use in clean environments like hospitals and food production facilities. Includes 1 standard trolley and 1 chain block. Weight: 190kg.

Mobile Gantry Crane 5000 [5000kg]

This tall aluminium gantry has a generous 5 tonne lifting capacity, making it perfect for handling heavier loads in remote locations.

Consisting of two A-frames, a 4.57 metre long lateral beam and a wheeled trolley, the Mobile Gantry Crane 5000 is a more practical alternative to a large fixed gantry crane as it can be moved around site, dismantled and is compact enough to be easily stowed away or transported.

With a maximum lifting height of 4 metres, this taller gantry crane model is a simple solution for handling larger loads such as water lock gates, boats, HVAC equipment and even goods or personnel lifting. Includes 1 standard trolley and 1 chain block. Weight: 294kg.
