***SKYGUARD KITS ARE SPECIFIC TO EACH MODEL AND SERIAL NUMBER.
VISIT ONLINE EXPRESS FOR MODEL/SERIAL NUMBER INFORMATION PRIOR TO ORDERING.**

For more information regarding SkyGuard, see reverse or visit www.jlg.com/destination/skyguard.

**Sale prices are valid on listed part numbers only. Quantities are limited and backorders will not be honored. Sale prices are valid until stock is depleted, at which time a superceded part number will be offered. Superceded part numbers are not part of this promotion or on sale.*

HOW SKYGUARD WORKS

When activated, SkyGuard stops all functions in use at the time. The reverse functionality of SkyGuard is the only feature of its kind in the market. After stopping the machine, it temporarily reverses, or momentarily “undoes” most functions that were in use at the time of activation for less than a second’s worth of time.

- Can be activated from a variety of angles
- Provides additional protection without impeding or reducing the work envelope
- With no movable parts, there’s no need for scheduled or additional maintenance
- Break away feature for extreme conditions
- Resets by cycling foot switch or e-stop
- Does not increase the platform profile or limit the use of the platform

PREPARE NOW FOR THE FUTURE

The SkyGuard® system will become standard on JLG boom lifts ordered in Europe, Australia, and New Zealand beginning in July 2016 and in the rest of the world in January 2017. Now is the perfect time to outfit your current machines with SkyGuard.
