

SkyPower® Accessory

Raising Productivity to a Higher Level

The JLG® SkyPower® Package enables the addition of many productivity enhancing accessories. Machines with the SkyPower system are equipped with a self-contained 7500W generator with a power cable, and an integrated air line. A side-entry platform provides improved entry and allows for later quick installation of the SkyGlazier® panel tray. In addition to providing self-contained AC power to operate hand tools, the SkyPower system enables other accessories to be conveniently added, including SkyWelder® and SkyCutter® packages.

JLG Workstation in the Sky® Power Accessories

A self-contained 7500W generator (normally renting for \$1,300/mo.) provides the power to the platform for tools, lights or JLG accessories, creating a “Workstation in the Sky.” The integrated power cable and air line allow you to quickly attach or detach a variety of JLG accessories.

Save Time and Money

Eliminate the need to move and reposition the generator, resulting in an estimated time savings of 1.25 hours per shift (a savings of \$880 per machine for a 20-day work month). Plus, eliminate the tracking and delivery costs associated with a separate generator. Save fuel by using SkyPower in place of a separate ground based generator. Using SkyPower 75% of the time (8 hours per day, 20 days per month) would result in a fuel savings of \$112 per month.

And factory routed cables reduce power cable damage—An average of \$150 in material, plus lost productivity per incident, based on \$44 per hour, results in a total savings of \$194.

Available on these JLG Models:

Telescopic Boom Lifts

400S, 460SJ, 600S, 600SJ, 660SJ, 800S, 860SJ, 1200SJ, 1350SJ

Articulating Boom Lifts

600A, 600AJ, 800A, 800AJ

Quantified Savings Per Month

Time (productivity) Savings	\$ 880
Damaged Cable Replacement (per incident)	\$ 190
Fuel Savings	\$ 112
Generator Rental	\$1,300
Delivery Charges	\$ 100
Estimated Monthly Savings	\$2,586

Value Guide SkyPower® Accessory

Specifications

Wattage: 7500W at 100% duty cycle

Voltage: 240V; 60Hz; 3-Phase; 7.5kW and 240V/120V; 60Hz;
Single Phase; 6.0kW (circuit breaker protected)

400V; 50Hz; 3-Phase; 7.5kW and 220V; 50Hz;
Single Phase; 6.0kW (CE version)

Power: Belt Driven at 1800 rpm (Ultra Booms are driven hydraulically).
Separate 110V and 220V receptacles included in the platform

Platform: 8 ft (2.4 m) Side-entry, with self-closing gate
