Pipe Rack

Raising Productivity to a Higher Level

Adding JLG pipe racks to your boom or scissor lift increases worker productivity. By conveniently storing pipes and conduit, it improves accessibility and reduces time spent positioning materials for installation. And since materials can now be stored above the platform deck, more room is available for a second worker or other tools and equipment in the platform. It also creates an improved working environment by keeping materials off the platform floor and at a convenient height for lifting.

Platform Capacity

Adding this productivity tool can optimize the utility of your JLG lift and increase productivity by allowing more materials to be carried to the work area.

Platform Durability

The pipe rack option combined with JLG's durable square steel rails reduce the likelihood of costly damage to the platform rails that can occur when workers use the rails to hold and position materials.

Features

- Ideal accessory tool for plumbing, electrical and sprinkler contractors
- Convenient storage of pipe or conduit helps reduce worker fatigue from constant bending.
- Includes straps to hold materials in place during transportation.

Available on these JLG Models:

Electric Boom Lifts

E450A, E450AJ

Articulating Boom Lifts

600A, 600AJ, 800A, 800AJ, 1250AJP

Telescopic Boom Lifts

400S, 460SJ, 600S, 600SJ, 660SJ, 800S, 860SJ, 1200SJP, 1350SJP

Electric Scissor Lifts

2030ES, 2630ES, 2646ES, 3246ES

Rough Terrain Scissor Lifts

3394RT, 4394RT
