

MORE THAN A PAINT JOB

JLG[®]
RECON

JLG RECONDITIONING NEW LIFE FOR YOUR MACHINES

The JLG Reconditioning process repairs and restores boom lifts and telehandlers to original specification. We deliver factory-approved, warranty-backed equipment that looks and runs as good as new.

65%

Expand and enhance your fleet for less — reconditioning offers a savings of up to 65% over buying new.*

WHEN NOW ISN'T THE TIME FOR NEW

Not ready to replace your equipment or invest in new machines? JLG Reconditioning costs less than buying new equipment, making it a cost-effective way to expand your fleet.

LONGER FLEET LIFE. MORE ROI.

Our reconditioning process can service all JLG® boom lifts and telehandlers between 7 and 19 years old. JLG Reconditioning extends the longevity of your fleet — a restored machine can give you up to 7 more years of operation, paying you back with more uptime and greater ROI.

*Savings based off new machine list price and reconditioning a customer-owned machine. Actual savings will vary based on scope of work.

Our three-year warranty on JLG Reconditioned equipment surpasses the one-year industry standard.

FACTORY TESTED AND APPROVED

Our technicians follow strict JLG guidelines and new manufacturing techniques to restore your equipment to original machine specification. Equipment is fully inspected, factory approved and field tested before it leaves our facility. Plus, all reconditioned equipment is backed by a three-year warranty.

Every machine passes the required ANSI annual machine inspection and meets other ANSI standards — it's ready to go from facility to field.

PRECISION AND POLISH

JLG has one of the most comprehensive reconditioning programs in the industry. Every boom lift and telehandler that comes into our facility goes through a detailed, rigorous process to ensure they're restored to original specification — from top to bottom, inside out.

Our new equipment manufacturing processes and techniques ensure the highest level of precision.

WHAT MAKES JLG RECONDITIONING WORK FOR YOU?

- Attention to detail — all components are tagged and re-associated with the machine
- Our skilled, expert technicians have an average of 15 years of experience and know the equipment
- Strict JLG guidelines, high-quality parts and new manufacturing processes you'd expect from us
- 11-day average turnaround from teardown to ready to ship

11 DAYS

Our reconditioning process takes on average 11 days from teardown to ready to ship.
